

Product Labeling

E-Label

The product will use an E-label as it requires the smartphone for functional use and the product is small leaving no space for the permanent labeling directly on the device. The label is easily accessed on the app in 3 steps as shown in the figures below:

Step 1 open App.

Step 2, go to profile tab

Step 3 press Legal & Regulatory

Packaging Label

Since the product uses an E-label, it is required that the certification labeling is also placed on the product somewhere but is not required to be permanent or physically on the product. We have chosen to place it on the product packaging as shown in the figures below. The label size is 25mm x 54mm.
