1

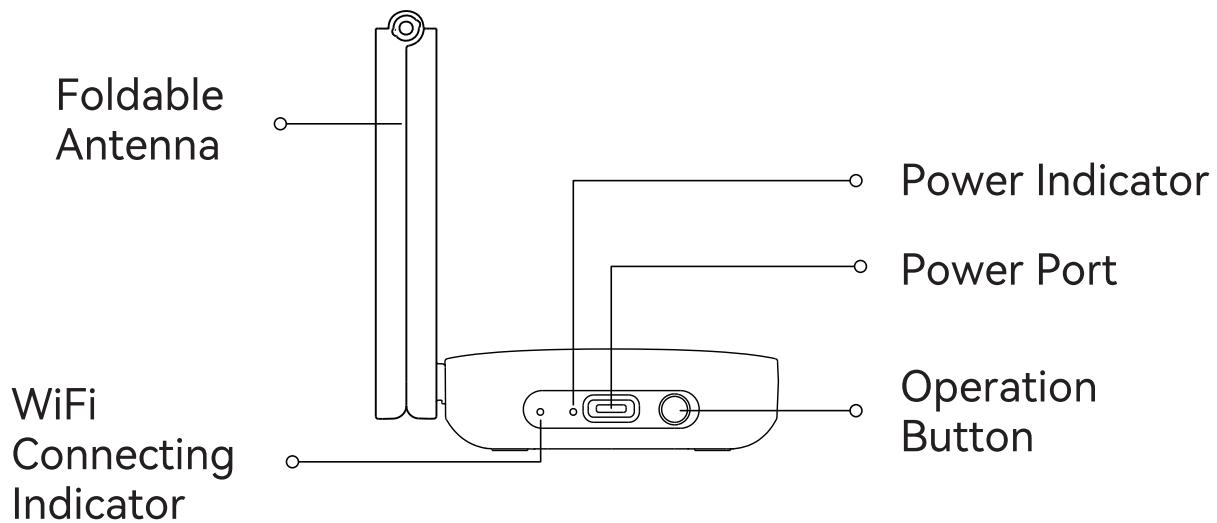

2

3

1. HWG023WBRF WiFi Gateway*1
2. TYPE-C USB Cable*1
3. User Manual*1

1.2 Product Overview

HWG023WBRF WiFi Gateway

Button and indicator function: Press and hold the button for about 5 seconds to activate WiFi connection mode, and the WiFi connection indicator light will begin to flash.

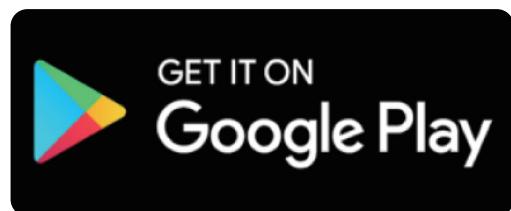

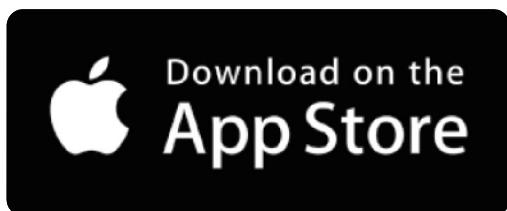

1.3 Specification

- **Working Voltage:** 5V
- **Working Temperature Range:** 3°C-40°C(37.4°F-104°F)
- **Powered By:** Type-C USB Cable

2. CONNECTION AND INSTALLATION

2.1 Install the RainPoint Home APP

- Search for "**RainPoint Home**" in the Google Play/App Store or scan the QR code to download the app.

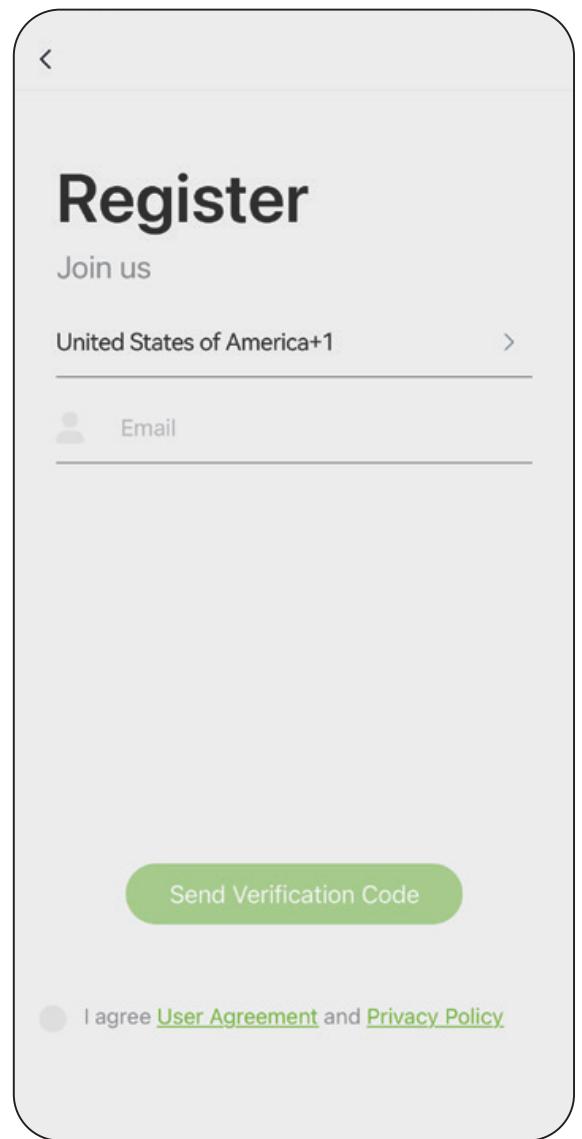

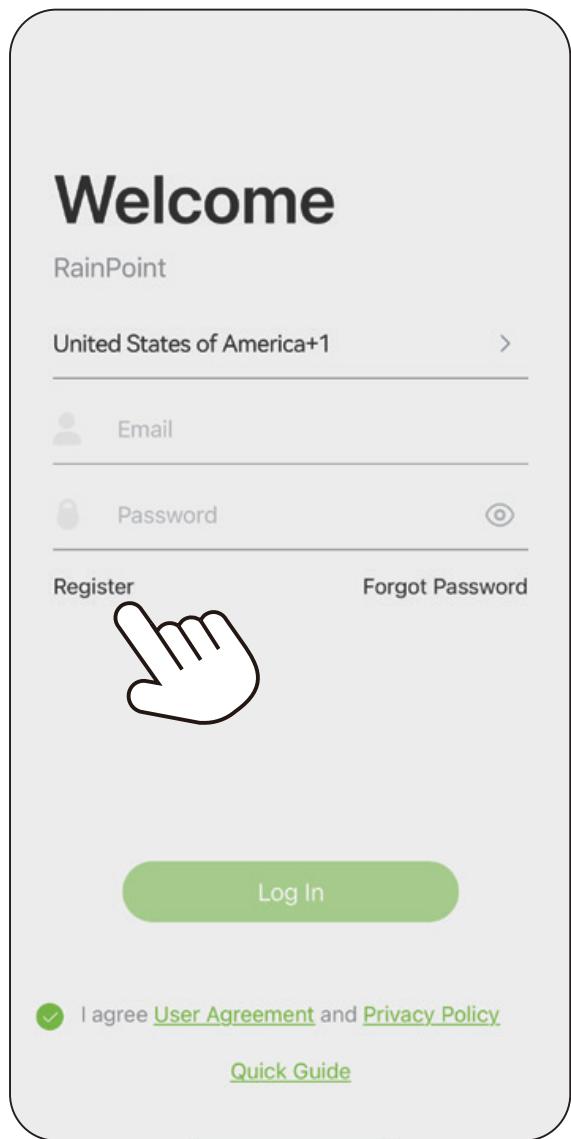

iOS

Android

b. Register Your "**RainPoint Home**" account: Open the "**RainPoint Home**" app and select "**Register**". Follow the prompts to create a "**RainPoint Home**" account using your email or phone number.

2.2 Connection Steps

2.2.1 Preparation for Connection

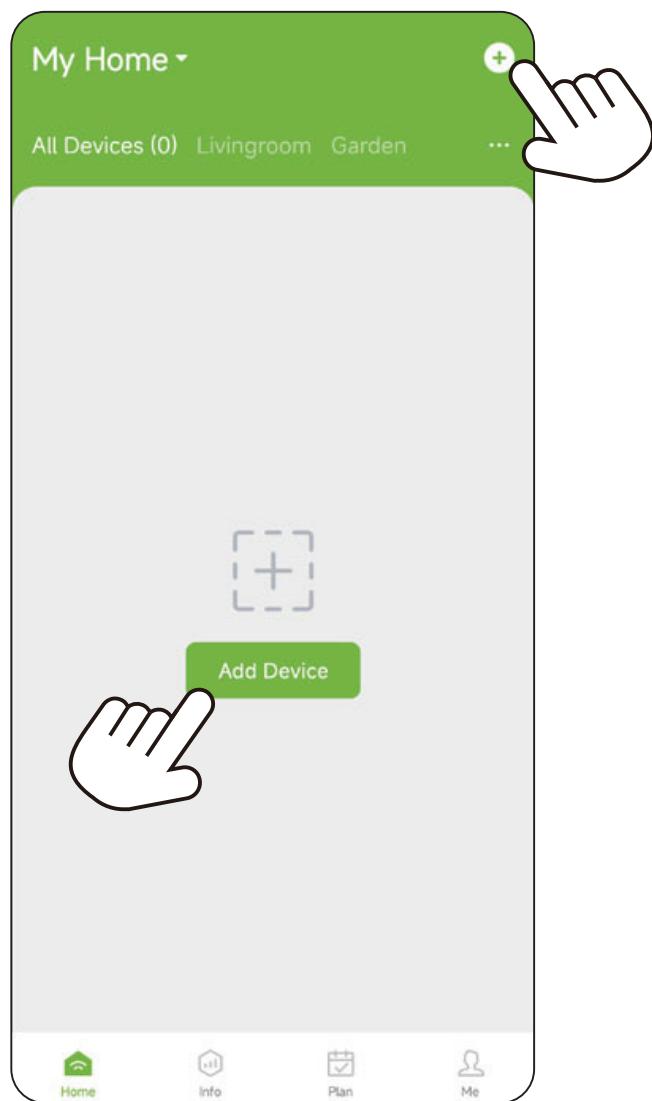

To ensure your gateway connects to your phone, it must meet the following requirements:

- Before using the **RainPoint Home** app to connect the device, please ensure that your phone is connected to a **2.4GHz WiFi network**, as the gateway must operate on 2.4GHz WiFi.
- **iOS Requirements:** iOS 11.0 (or later) mobile device with cellular data or WiFi service.
- **Android Requirements:** Android OS 6.0 (or later) mobile device with cellular data or WiFi service.
- Do not use public Wi-Fi networks.
- During the pairing process, keep the gateway and your phone within 10 feet (3 meters) of each other.
- If you need to change the connected WiFi network, press and hold the operation button on the gateway to reset it (please refer to 4 RESET THE DEVICE in the manual for instructions) and reconnect.

2.2.2 WiFi Connection

Follow the steps below to complete the device connection, ensuring that the gateway is close to the router during the connection process.

- a. Select the "+" icon in the top right corner of the app homepage to add a device, or you can click the "**Add Device**" on the app homepage to add a device.

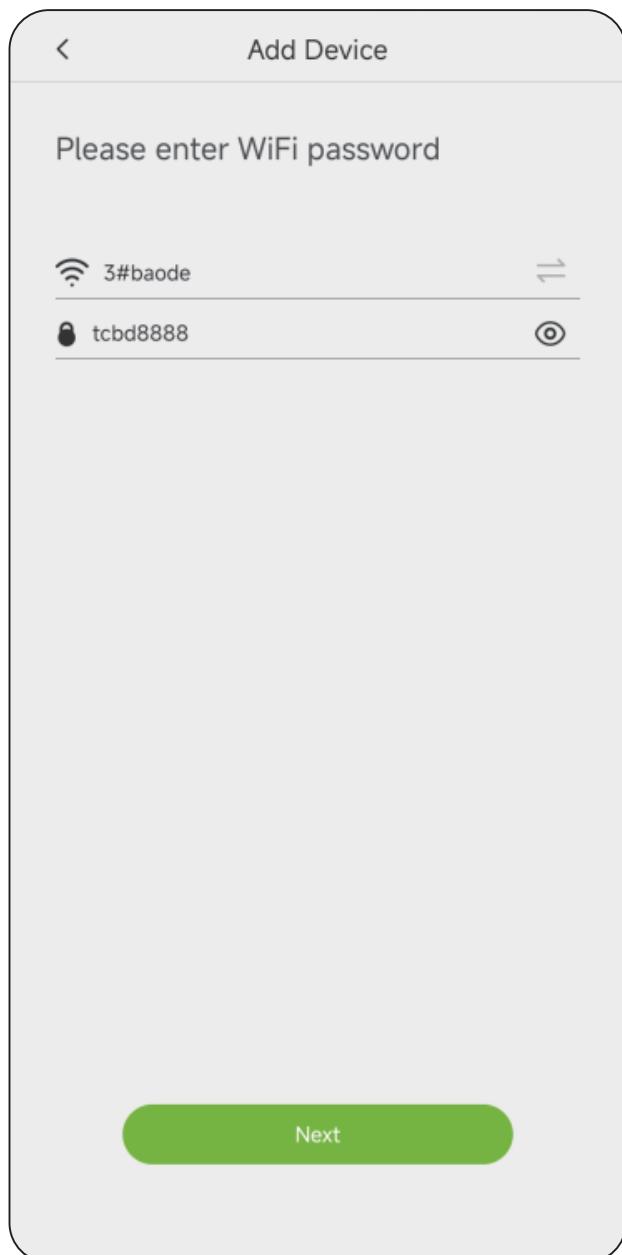

b. Find and tap "**HWG023WBRF**" or scan the code on the gateway to add the device, then proceed to the next step.

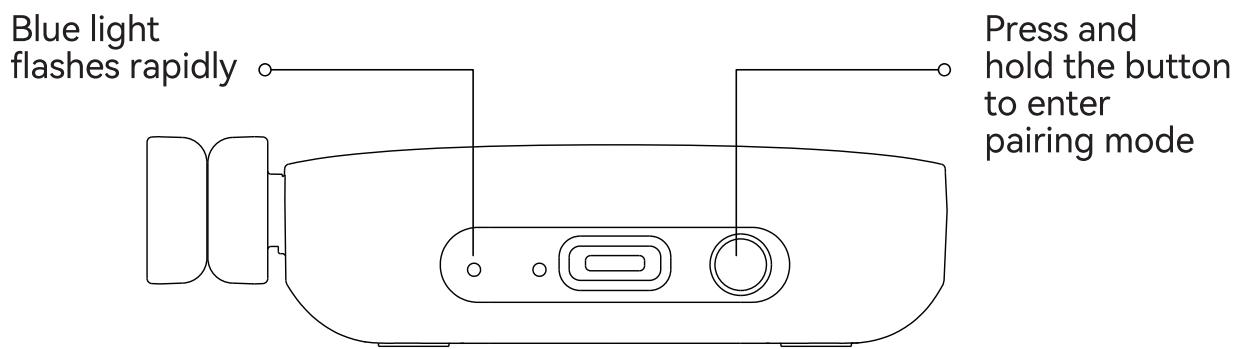

c. Enter the WiFi password and click "Next".

NOTE: Please make sure to connect to your 2.4GHz WiFi for the device pairing.

d. Follow the prompts on the page to complete the connection.

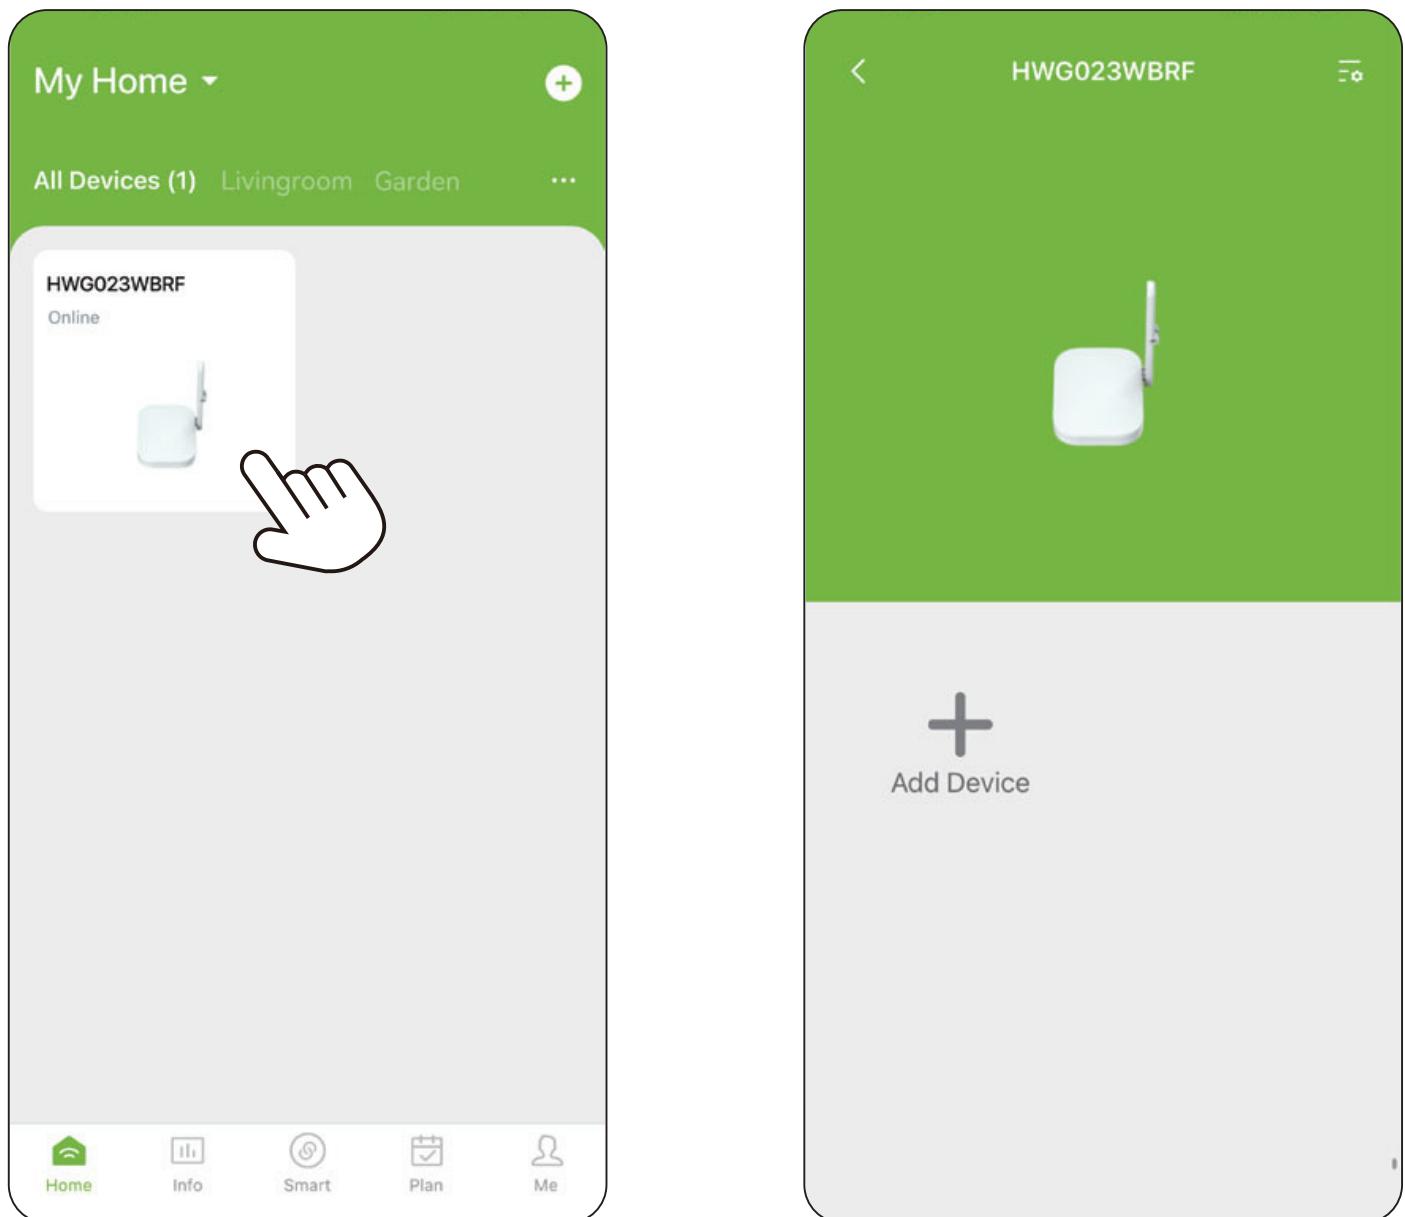

- ① Power the gateway using the type-C USB cable.
- ② Press and hold the button until the WiFi connecting indicator light on the device flashes blue rapidly, indicating that the device is in pairing mode.

e. Click "Next" to enter pairing mode in the app.

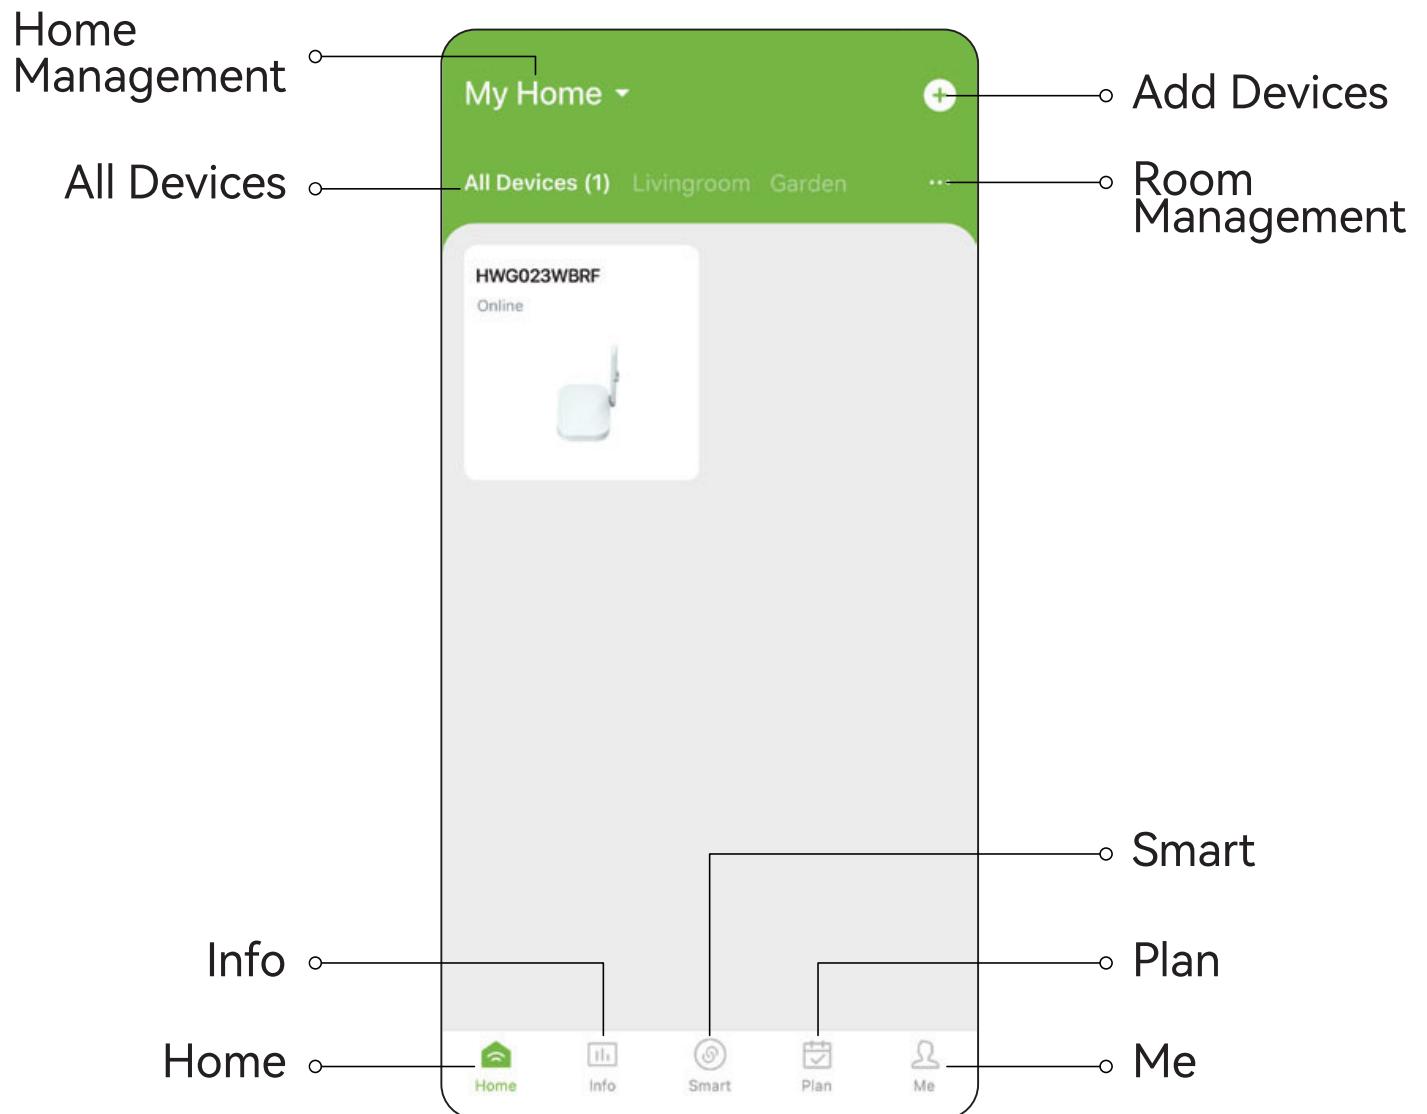

f. Congratulations! The device has been successfully connected, and the gateway icon will display on the app homepage. You can click the gateway icon on the app homepage to enter the gateway homepage for more settings of the device.

3. APP INTRODUCTION

3.1 APP Homepage

Home Management

You can locate your home, customize the home name and add family members or add other homes. It is convenient for you to manage irrigation schedules for different residences.

All Devices

A check list of all the devices you have connected. Tap the icons to enter the operation page of devices you have added to program the operation schedule of the device.

Info

On the "Info" screen, you can check the weather conditions for the next seven days in your area and the next plan time of the devices you have connected.

Home

On the "Home" screen, you can view the connected devices and their online/offline status. You can click on the icon to enter the device's homepage and customize settings for different devices.

Add Devices

You can add multiple RainPoint devices on the APP to create a smart home irrigation system.

Room Management

Room Management is for indoor automatic irrigation system in different rooms.

Smart

On the "Smart" screen, you can click the "+" icon in the top right corner or click "Create Smart Scene" to create multiple smart schedules for the device. This allows the valve to automatically open and close when preset conditions are met, enabling watering at desired times.

Plan

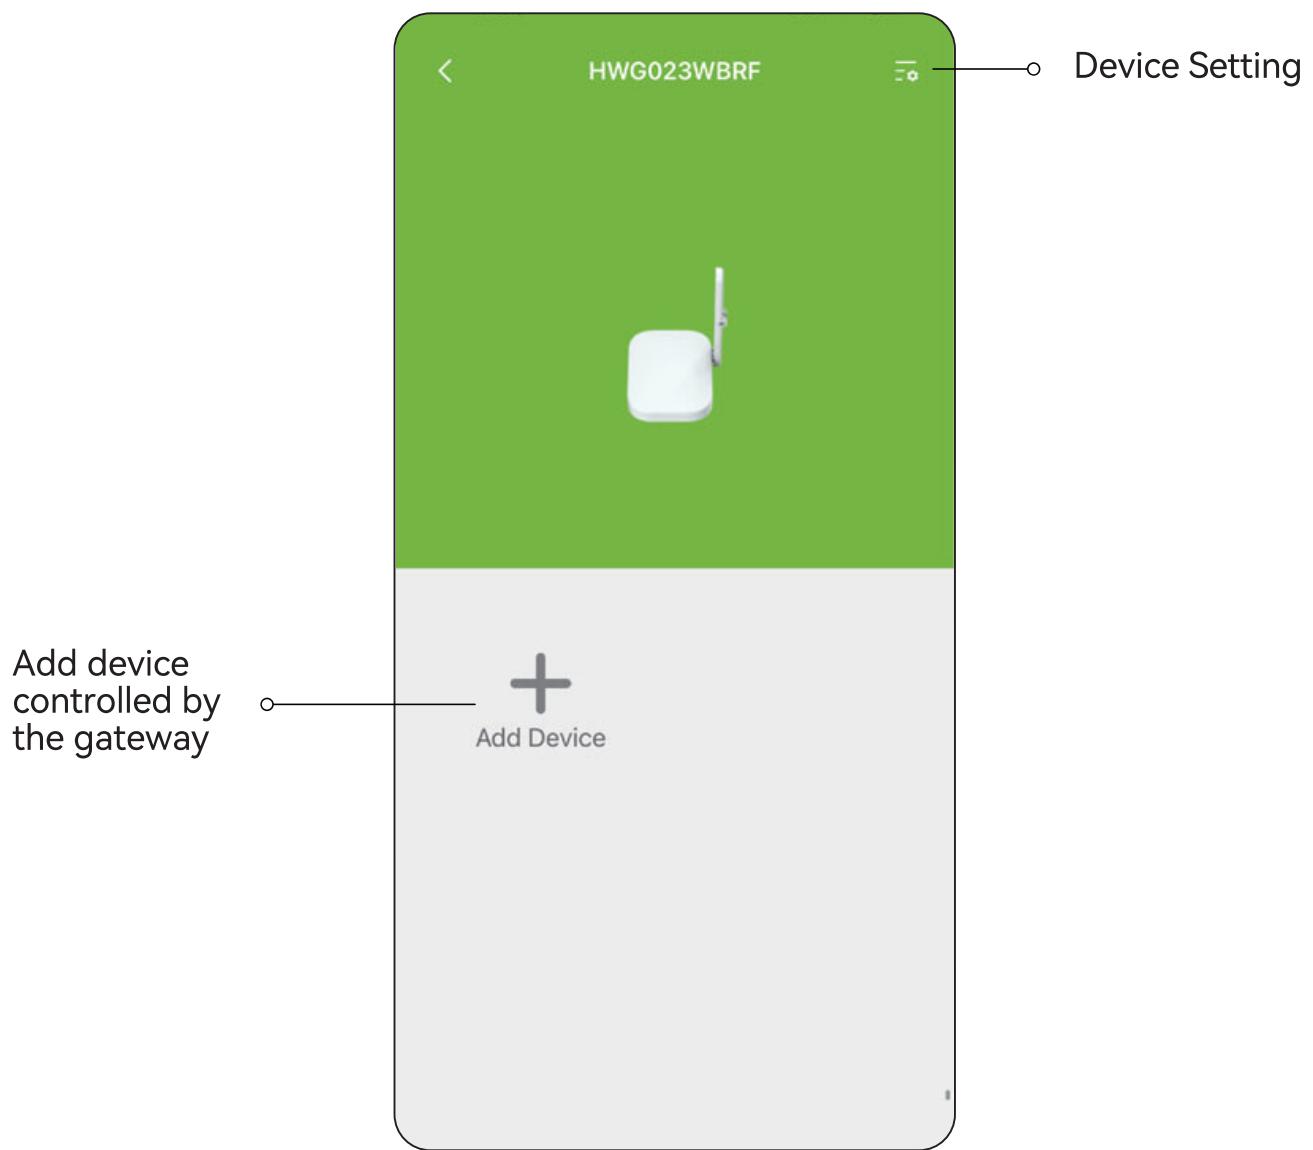

On the "Plan" screen, you can view, customize, and turn on or off the watering schedules for the devices. You can also turn on or off the "Rain Delay" function for rainy days and choose its duration from 24, 48, or 72 hours.

Me

On the "Me" screen, you will receive notifications for device online/offline status, irrigation records, and alerts for high temperature under "Event". Get FAQs and user manuals, as well as report issues through "FAQs & Feedback". Connect the water timer to your Google Assistant or Amazon Alexa for voice control of the valve. Adjust language preferences and turn on/off notifications in the "Settings" menu.

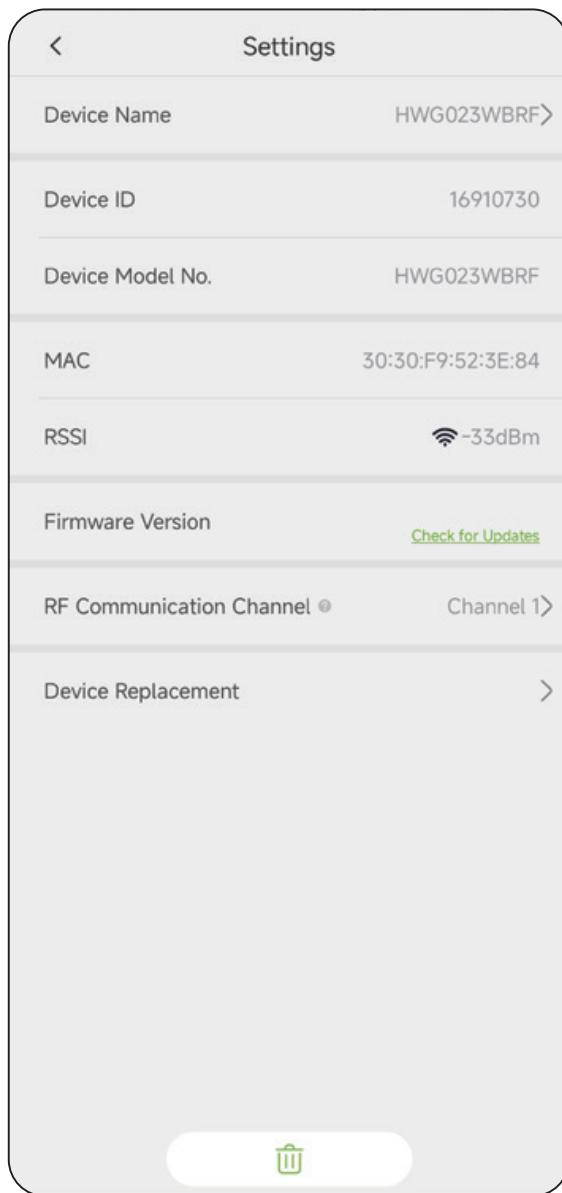

NOTE: After the gateway and device are connected, the device list will be displayed on the app's homepage and the gateway's homepage. You can click on the device icon in the "All Devices" list to enter the device page, or click on it from the gateway's homepage to access the device settings.

3.2 Gateway Homepage

3.2.1 Basic Settings

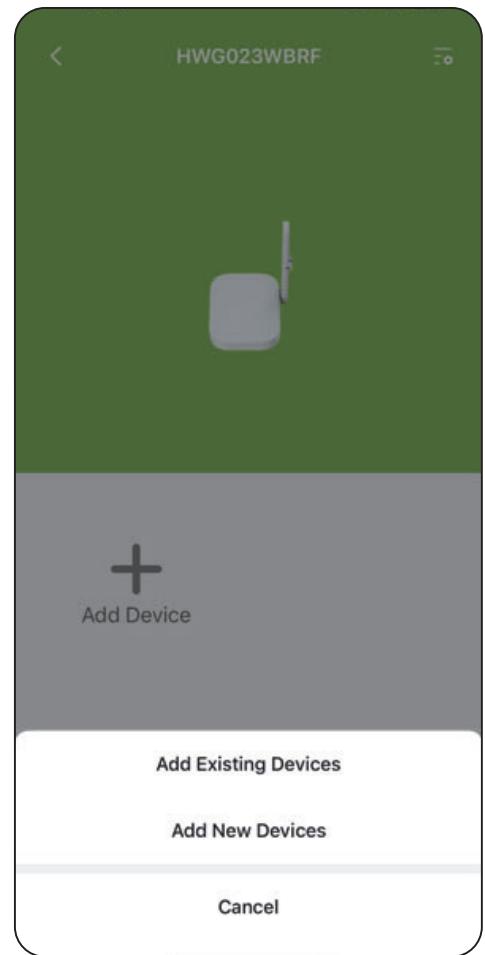

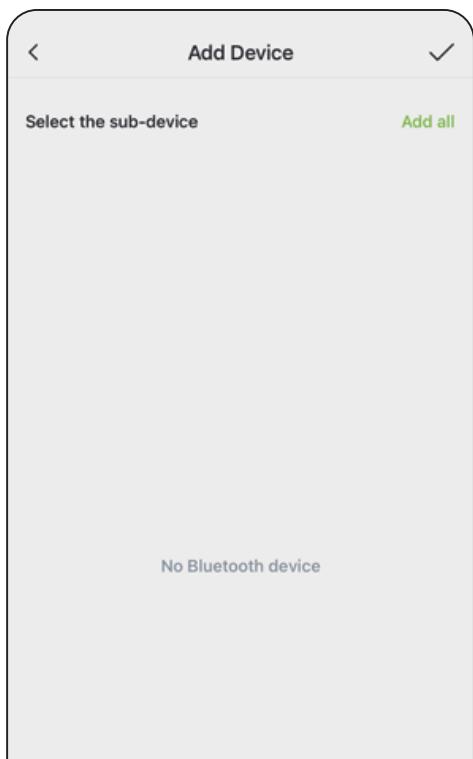

Find the icon in the top right corner of the gateway's homepage to access the "Settings" page. In the basic settings, you can view the device's basic information and make some fundamental adjustments to the device.

3.2.2 Add Sub-Devices

You can click "**Add Device**" to add a new device or add an existing Bluetooth device.

*One WiFi gateway can connect up to 4 timers. As we have many models of WiFi timers that can connect to the WiFi gateway, if you want to know the models that can use with the WiFi gateway, please contact us for assistance.
US toll free(English): +1 833-381-5659

FCC STATEMENT

(FCC ID: 2AWDBHWG023)

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- 1) This device may not cause harmful interference.
- 2) This device must accept any interference received, including interference that may cause undesired operation.

FCC Warning: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Note: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.
