

Cover Letter modification Information

FCCID: 2AWH9-EDGE

IC ID: 26135-EDGE

Model Name: RENASYS EDGE (66803126)

Hardware changes to PCB/PCBA make small adjustments to non-signal copper and solder resist for the sole purpose of improved manufacturability. No components have changed position or type, no signal traces have been adjusted, and no ground, power or copper fill areas have been changed.

Software changes incorporate additional languages and additional regulatory information screens, cross-check routing header vs source from BLE/USB, and resolved a product security observation.
