

MagicDash 4 | Quick Guide

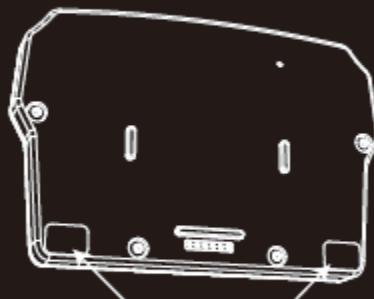

1. Overview

MagicDash 4 can be magnetically attached to compatible devices using the built-in magnets on the back.

Front

Rear

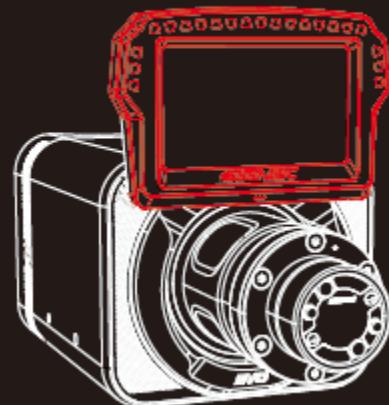

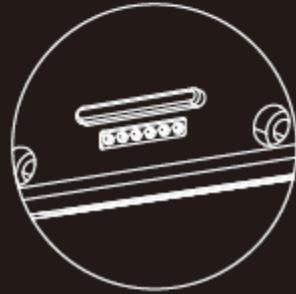

2. Install the Screen

2.1 Installing on the Alpha EVO Wheelbase

EVO Base Port

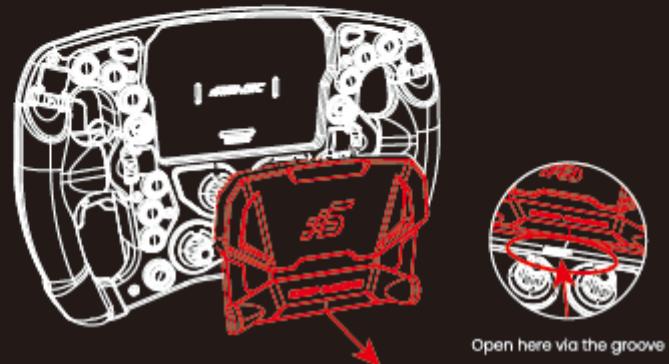

MagicDash 4 Port

The positioning slot enables automatic alignment, ensuring the screen is securely and stably mounted onto the base.

2.2 Installing on Zeus Series Steering Wheel

- ① Remove the cover plate from the steering wheel.

- ② Mount the screen onto the recessed area.

2.3 Installing on the MagDock

*MagicDash 4 is compatible with the Alpha series and third-party bases (with front mounting holes) via the MagDock.

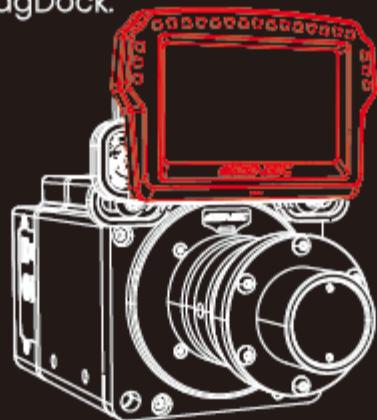

MagDock Port

MagicDash 4 Port

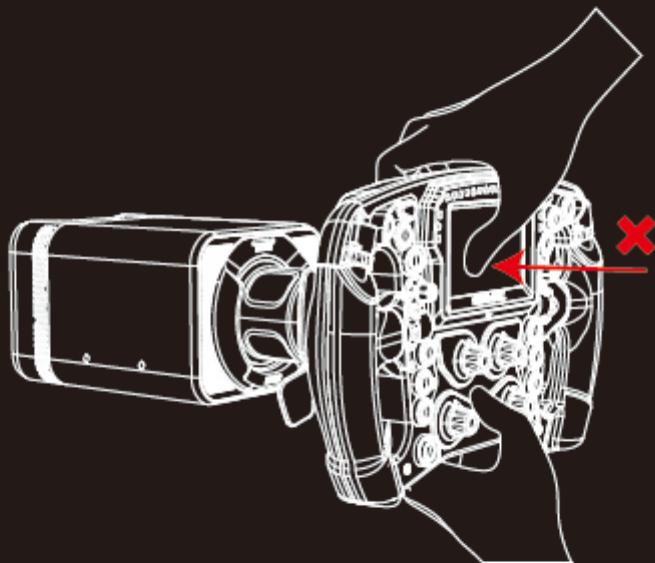

The positioning slot enables automatic alignment, ensuring the screen is securely and stably mounted onto the MagDock.

3. Precautions

When removing the wheel from the base, avoid pressing on the screen to prevent damage.

Software & applications

Install SimPro Manager
on PC to complete setup

FCC Statement

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
