

To Whom it may concern:

We are submitting for a new FCC ID for Curien's N2 Neuron Multimeter model number N2B0101 which is a private label of the Mooshimeter's multimeter, part number DMM-BLE-2x01A.

Our new proposed FCC ID is:

- FCC ID: 2AWKW-N2B0101

The original FCC ID is:

- FCC ID: 2ACIW-DMMBLE1 granted 2014 - 09 - 12

The equipment differs only in outward color and marketing markings such as label and colors, otherwise the equipment is the same.

Because the equipment is equivalent in design and manufacture to the original, the test results apply to the "new" product.

A new user guide has been provided with the same regulatory statements of the original, only changing marketing label and content, otherwise the original guide's purpose and content is being retained.

Best Regards,

A handwritten signature in black ink, appearing to read "Joshua Carton".
