

N120 User Manual

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference caused by other devices.
Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

— Reorient or relocate the receiving antenna.

— Increase the separation between the equipment and receiver.

— Connect the equipment into an outlet on a circuit different

from that to which the receiver is connected.

— Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate (SAR) Information

This Mobile Phone meets the government's requirements for exposure to radio waves. The

guidelines were developed by the FCC after extensive scientific evaluations

through public and through evaluation of scientific studies. The standards include a

substantial margin designed to assure the safety of all persons regardless of age or

health.

FCC RF Exposure Information and Statement The SAR limit of USA/FCC is 1.6 W/kg and used

over the entire body. The SAR value reported under this standard during the product certification

for use at the ear is 0.559 W/kg and when properly worn on the body is 0.757 W/kg. This device

meets FCC RF exposure requirements when used with the antenna and accessories provided

with this device. To maintain compliance with FCC RF exposure requirements, use accessories that

meet the antenna requirements of this device. The use of belt clips, holsters and similar

accessories may not maintain compliance with RF exposure

requirements. The use of accessories that do not satisfy these requirements may not comply

with FCC RF exposure requirements.

Body-worn Operation

This device complies with FCC RF exposure requirements for typical body-worn operations.

To comply with RF exposure requirements, a minimum separation distance of 15mm must be maintained between the

user's body and the handset, including the antenna. Third party belt-clips, holsters, and similar

accessories may not maintain compliance with RF exposure requirements. Many

accessories that do not meet these requirements may not comply with RF exposure

requirements and should be avoided. Use only the supplied or an approved antenna.
