TRUSTEE

Hushmesh solves digital Trust on the Internet for everyone, by enabling globally trustworthy identities and end-to-end cryptographic data security.

Based on Microsoft's Azure Sphere technology, Trustees are wall-plug IoT devices that automate cryptography on behalf of their users, in the privacy and security of their own homes. This approach makes end-to-end cryptography usable by everyone.

It is super easy to set up: You plug in your Trustee at home, you connect it to Wi-Fi, and you link your phone with it. That's it! Your Trustee is always on and connected, actively ensuring that no one can falsely claim to be you.

You can now use your phone to "Mesh In" and establish trust with any relying party on the Mesh, from anywhere in the world.

Your phone remotely directs your Trustee to complete cryptographic transactions on your behalf.

Specifications:

- Connects to 2.4GHz Wi-Fi only
- Your trustee has no camera, no microphone
- Power: AC100-240V, 50-60Hz, <2W
- Hardware v1.0 / Software v1.0

FCC Warning

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
