Re: RF exposure information for:

Product name: FiGS 2.0 with FCC ID 2AX6V-FIGS2

To Whom It May Concern:

FiGS 2.0 is a portable device intended for use within 20 cm of humans and must demonstrate compliance to the either relevant SAR limits or demonstrate a maximum conducted output power less than the SAR exclusion thresholds pursuant to “KDB 447498 D01 General RF Exposure Guidance v06” at the specified distance to user and frequency range.

The properties of FiGS 2.0 are as follows:

- Maximum average conducted output power: 0.29 mW
- Distance to user: <5 mm
- Frequency range: 2400 to 2483.5 MHz

Power threshold according to KDB 447498 §4.3.1: 9 mW

The power threshold for SAR exclusion is respected hence FiGS 2.0 is compliant.

Please contact me if there is any information you may need.

Sincerely,

A handwritten signature in blue ink that reads "Jens Christofer Werenskiold".

Jens Christofer Werenskiold, Principal Engineer
