Wireless Charger with DashCam & Sentry Mode for Tesla

- **Built-in Tesla DashCam & Sentry mode reader**

Supports up to 2TB capacity and the special voltage stabilizer technique can deliver power stability for long-time usage.

- **Upgraded 15W EPP wireless charging**

Thanks to BoostLink™ Technology, providing single USB-C port for Tesla Model Y / Model 3 or two front USB-A ports for Model 3 (Pre-June 2020), supporting up to 15W fast-charging.

- **Compatible with all Tesla Model 3 and Model Y**

Include detachable USB-C & USB-A cables for good compatibility.

- **Various Charging ways**

Able to charge phones vertically or horizontally and support AirPods Pro & AirPods 2 charging.

- **Nicely fitted**

Slim design won't affect the opening and closing of Tesla's center console.

Model: JOWUAWC1

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement

This device complies with FCC radiation exposure limits set forth for an uncontrolled environment and it also complies with Part 15 of the FCC RF Rules. This equipment must be installed and operated in accordance with provided instructions and the antenna(s) used for this transmitter must be installed to provide a separation distance of at least 15 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter. End-users and installers must be provided with antenna installation instructions and consider removing the no-collocation statement.
