## FCC STATEMENT :

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

**Warning:** Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

## FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

# Precautions for Use

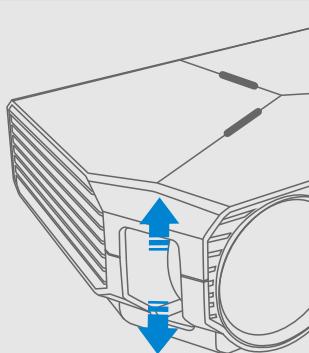

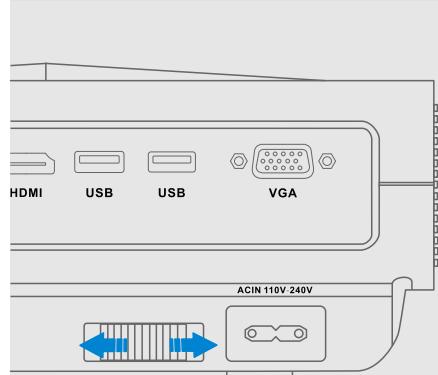

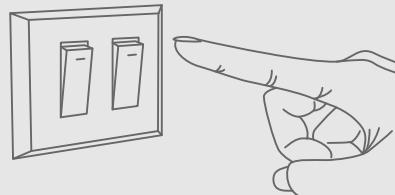

Follow these safety instructions and read these helpful tips before setting up and using the projector.

## Important Safety Instructions

	<p>Do not disassemble the projector. If needed, please contact your dealer for repair/replacement.</p>
	<p>Do not use the different power source, it may result in fire or electric shock. Please use the indicated type of power source.</p>
	<p>Do not look into the lens when the projector is operating. The bright light may damage your eyes.</p>
	<p>Do not use the projector near water or sources of heat.</p>
	<p>Place the projector on an even surface or stable stand. If the projector is mounted on a ceiling, it should be installed by qualified mounting hardware which designed for use with this projector.</p>
	<p>Unplug the projector after powering down.</p>
	<p>In order to maintain the performance and reliability of the projector, please leave at least 30CM between the projector and the wall.</p>

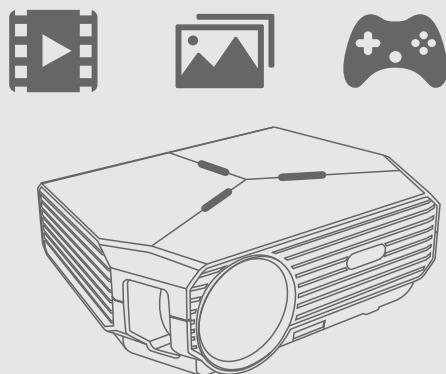

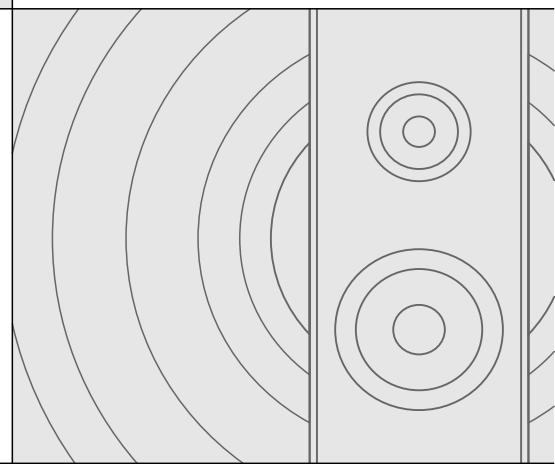

## Helpful Tips

For incredible clarity and optimum results, operating the projector in a dark environment is recommended.

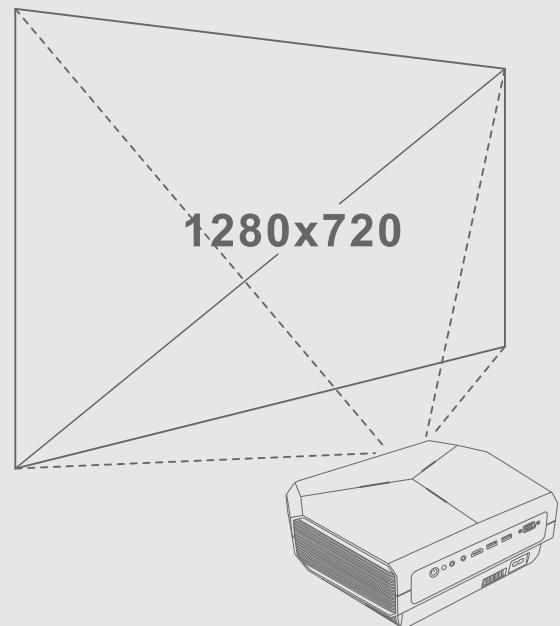

You may adjust the focus ring and keystone simultaneously until to get crystal clear images.

Please understand that the projector makes noise for heat dissipation during working. Nevertheless, it will not affect watching experiences when connected to an audio device.

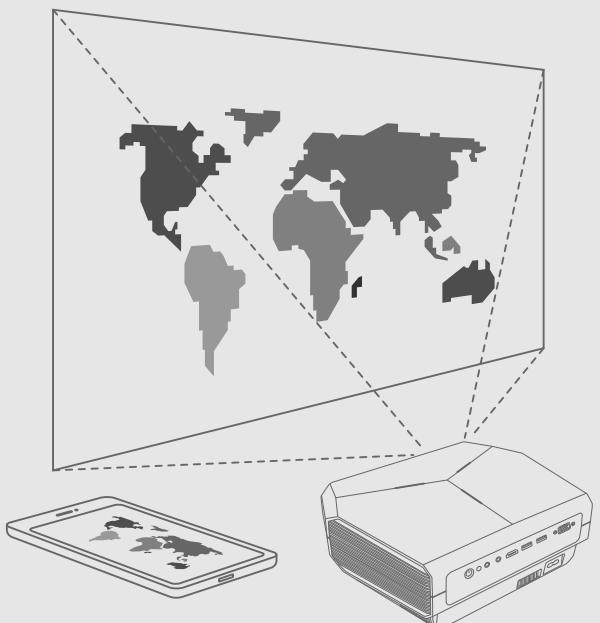

Projector is ideal for home entertainment, such as videos watching, photos viewing and games playing etc. Please be advised that the projector is not for business data presentation.

Maximum supported resolution of projector is 1920x1080 pixels with its native resolution of 1280x720 pixels

The projector supports screen mirror with smartphone. The only accessory you need to prepare is a HDMI/WiFi dongle.

The stability of mirror screen completely depends on the HDMI/WiFi dongle.

## Warranty

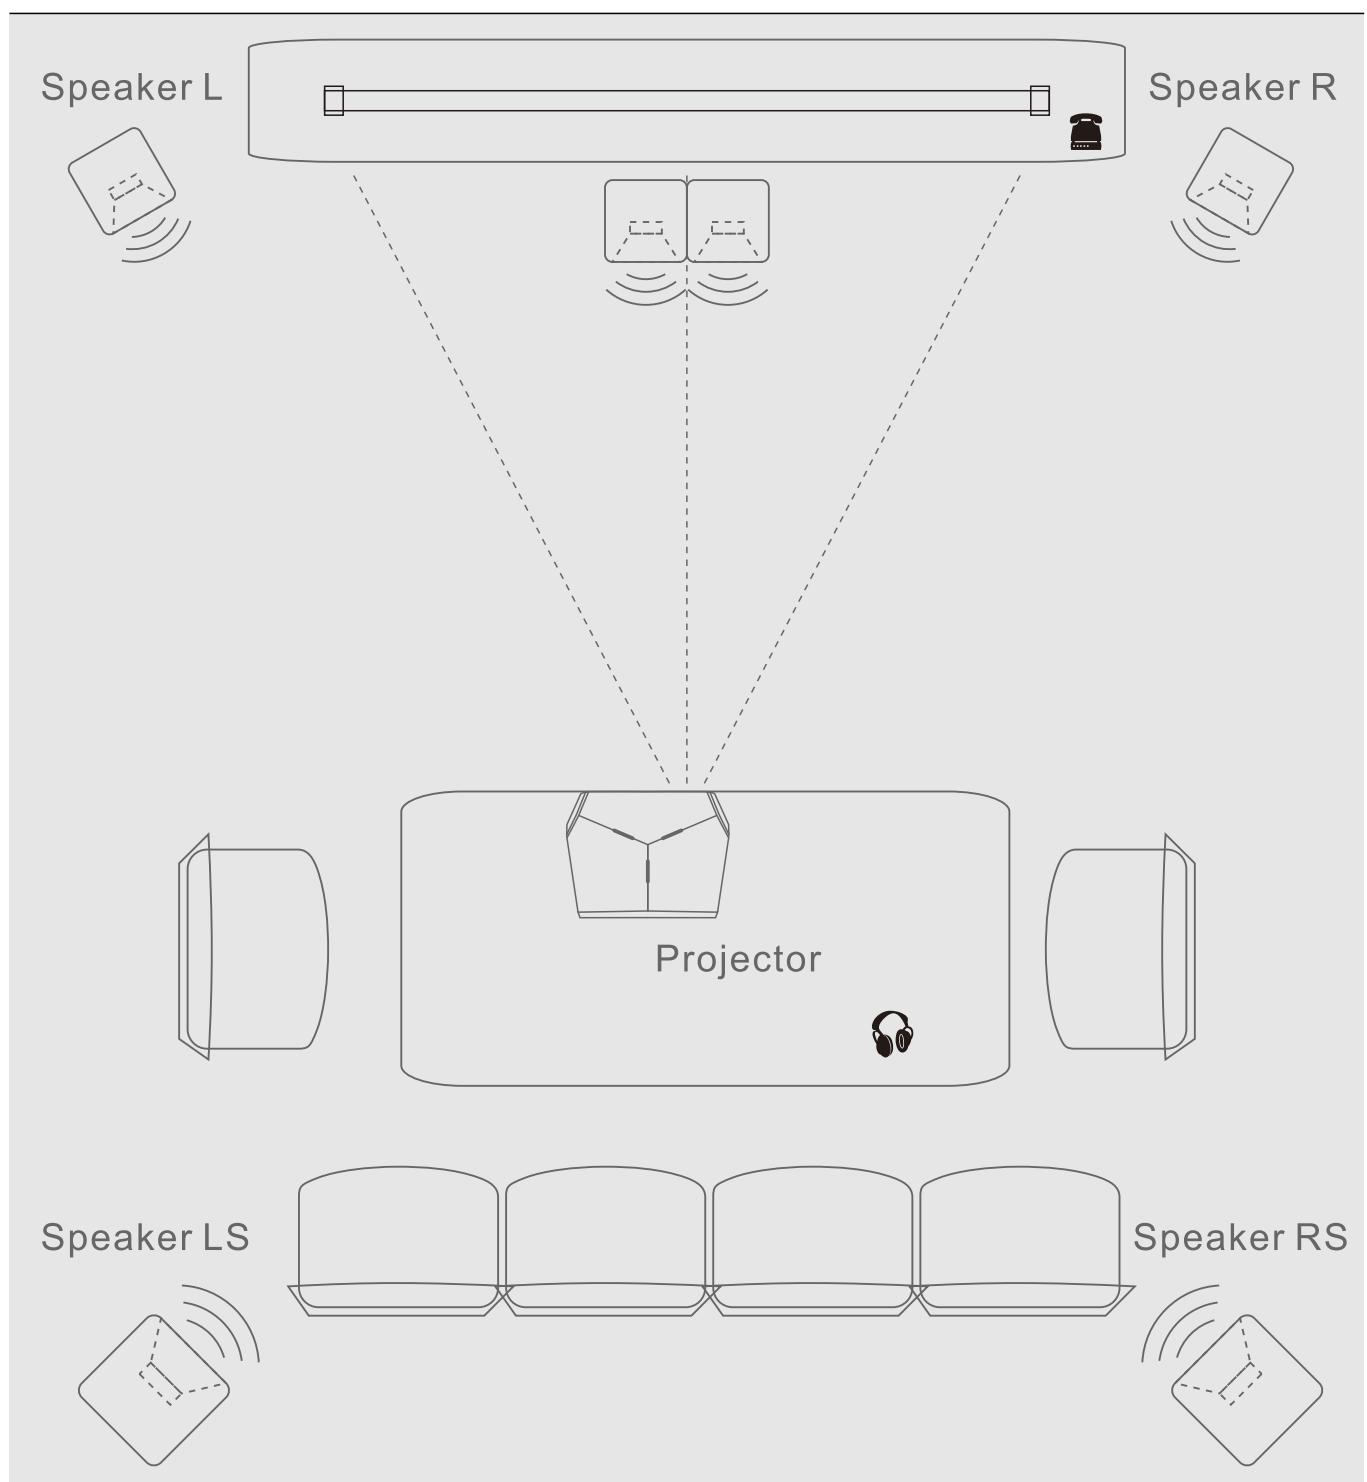

**Your projector comes with a free replacement or a full refund within 1 year that lets your product with confidence. However, this warranty does not cover the following:**

- Purchases from unauthorized resellers
- Improperly operated devices
- Purchases made over 1 year ago (unless you get an extended warranty)
- Free products
- Lost or stolen products

# Projector Features

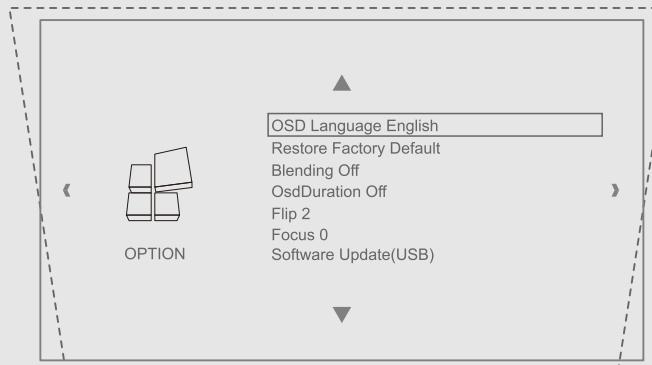

projector includes these special and outstanding features:

## Incredible Watching Experiences

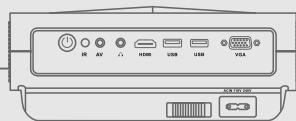

## Easy-to-use Setup and Operation Features

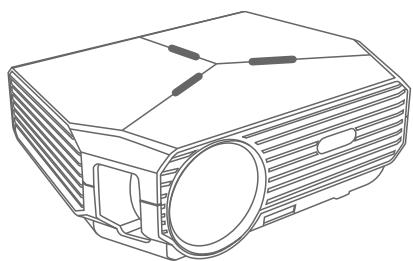

- User-friendly operating system

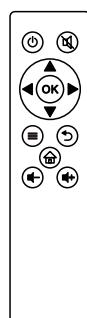

- Innovative keystone correction ring for flexible projector placement

## Product Box Contents

# Setting Up the Projector

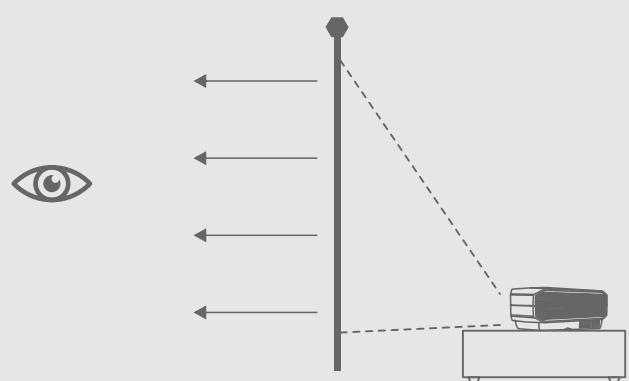

Before projecting, please be familiar with the following suggestions of placement, installation and adjustment.

## Projector Placement and Installation

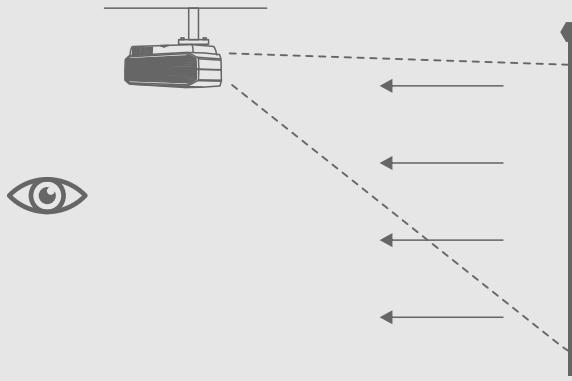

- Front

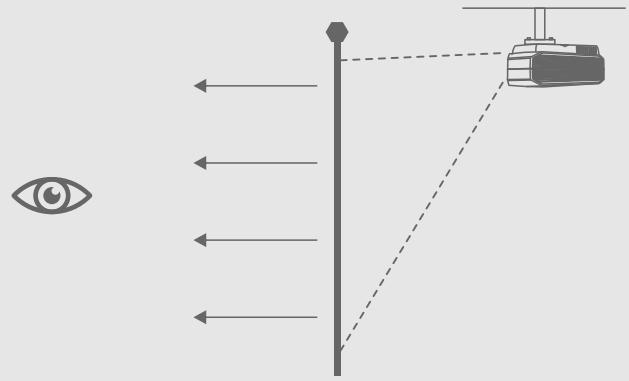

- Rear

- Front Ceiling

- Rear Ceiling

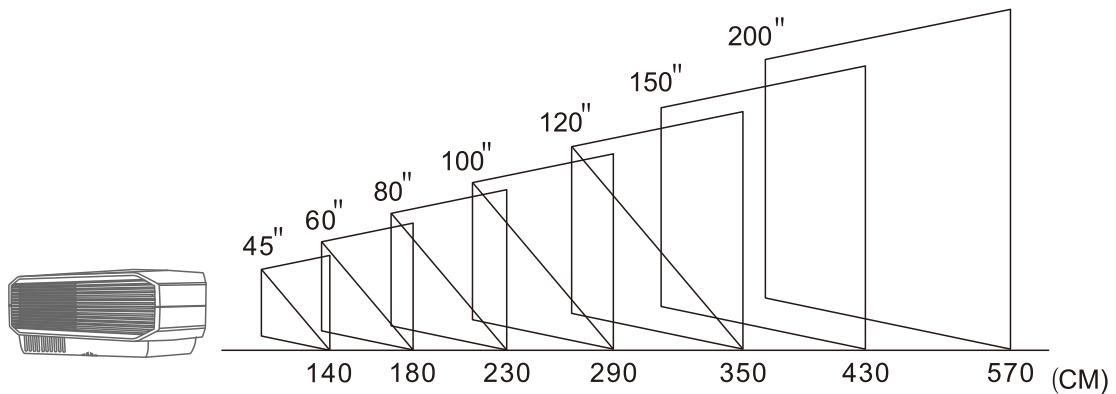

**Whether the way you choose to project your images or videos, please keep these suggestions in mind:**

1. Ensure the place you set the projector is sturdy and even;
2. Do not block the vents and always leave enough space for heat dissipation;
3. If the way you project is from the ceiling or from the rear, please ensure to select the correct projection option in the menu system.

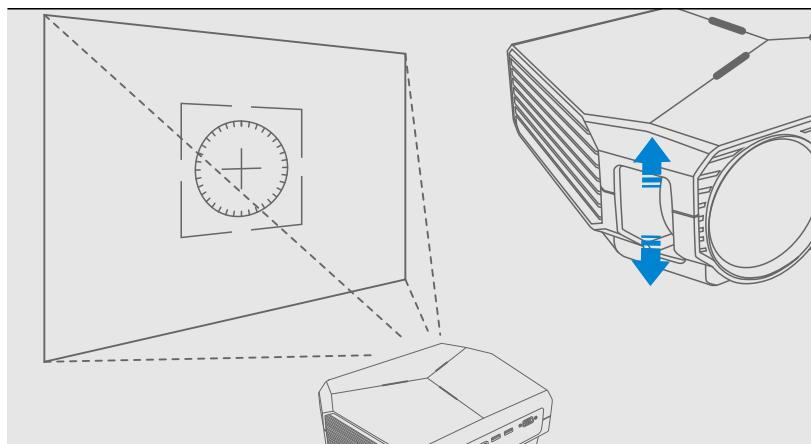

## Projection Distance and Screen Size

The throw distance, zoom factor, aspect ratio, and other settings determine the approximate size of the image. Please refer to the following table for the relationship between projection distance and image size.

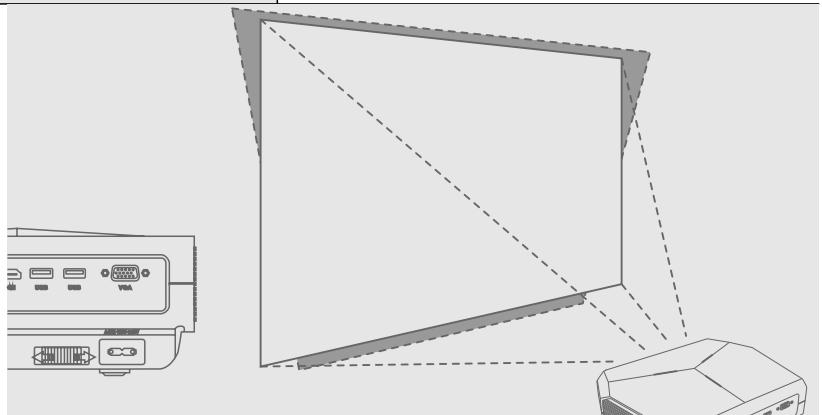

## Projector Adjustment

Except setting suitable throw distance, you can adjust keystone ring and focus/zoom ring manually before projecting your images or videos:

Rotate the focus ring to adjust the clarity of the projected image until it reaches to crystal clear.

Adjust the keystone ring to correct keystone distortion.

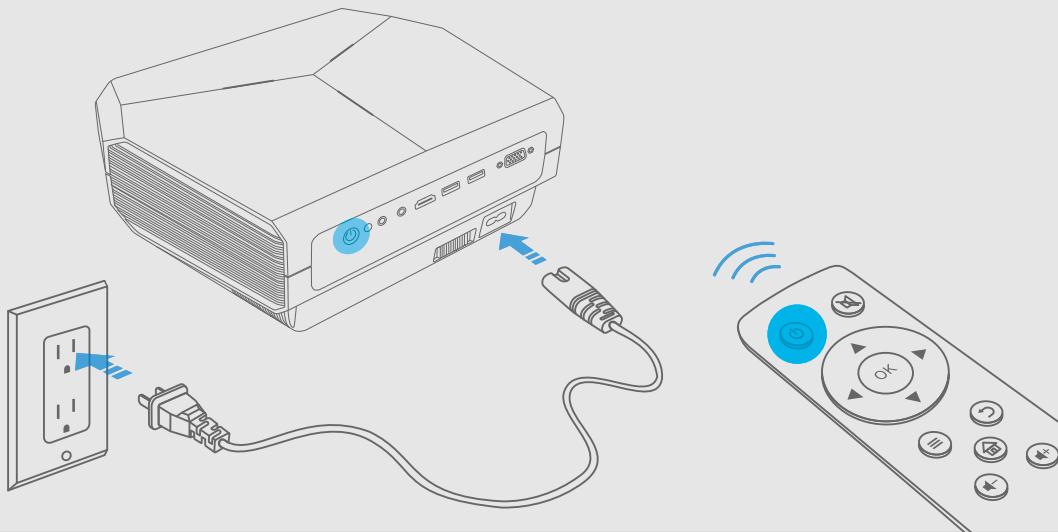

# Basic Projector Operations

Basic operations provided help you to get started quickly.

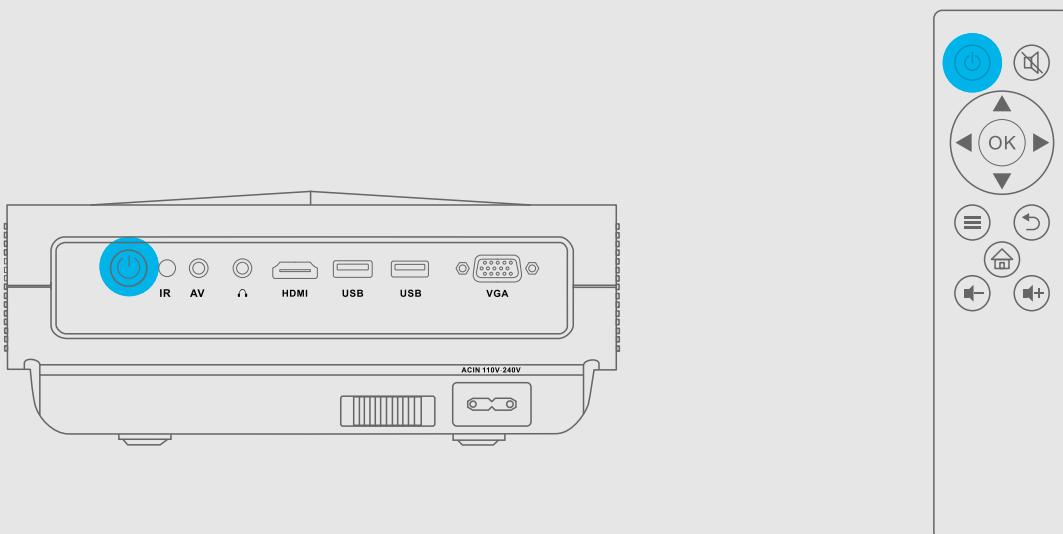

## Power on/off the Projector

- Power on the projector

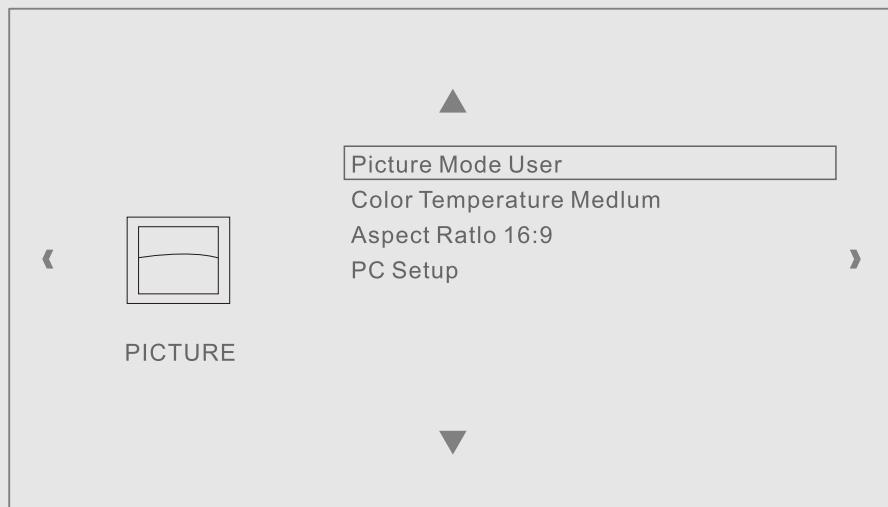

Indicator light will on after plugging in the power cord. Then press the Power button on the rear of projector or on the remote control, it enters into multimedia interface within 2 to 5 seconds.

- Power off the projector

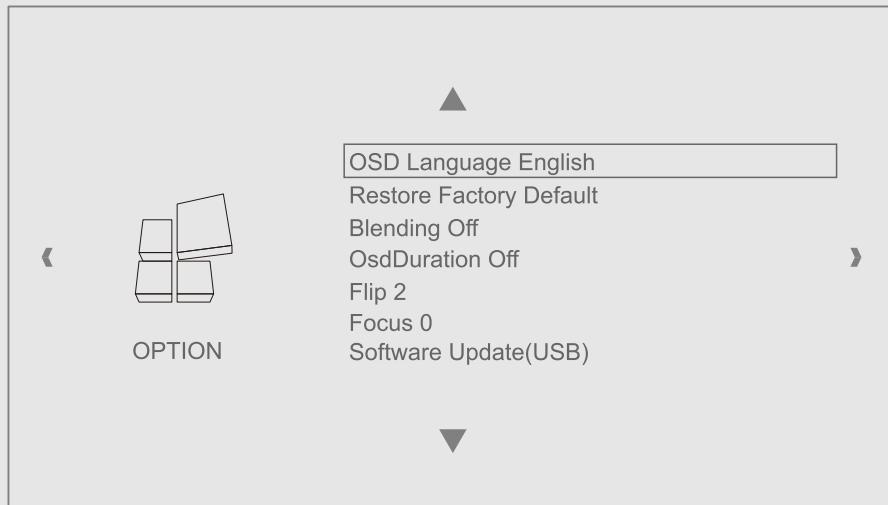

Press the Power button on the rear of Projector or on the remote control, the projector will shut off.

# Projector Menu Settings

- Press the Menu button on the remote control to access to the menu interface. The menu interface allows you to set Picture, Sound, Time and Option. Choose the feature you want to set by pressing the Left/Right button on the remote control or on the control panel

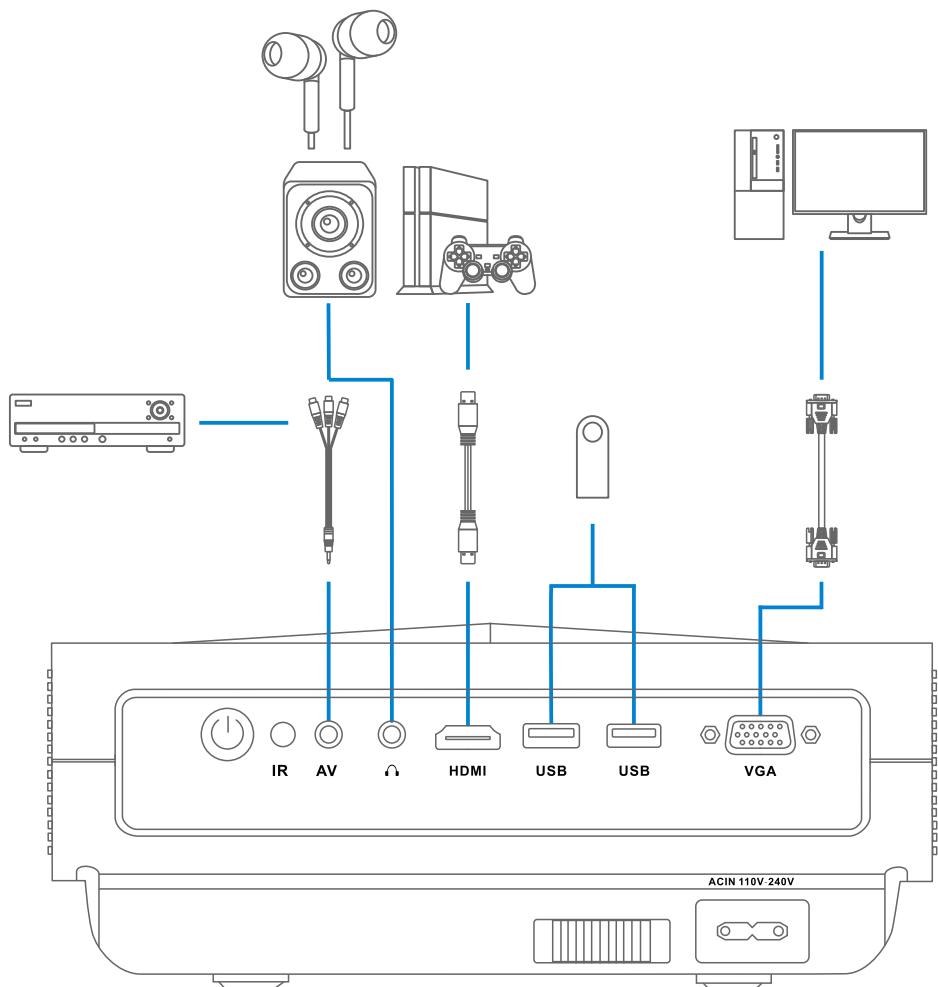

- For detailed settings, press the UP/Down button to view options listed under Picture, Sound, Time and Option. Then press the Ok button to select options. (Some of these options have a submenu, press the Menu button to exit a submenu.)

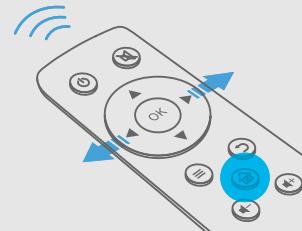

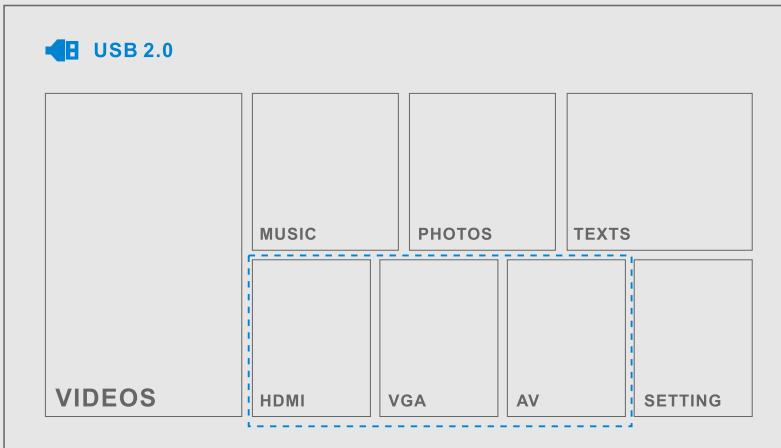

# Projector Connections

You can connect the projector to a USB device, an audio source, an AV equipment, a VGA device or a HDMI device to enjoy your presentations, images, or other videos, with premium sound.

## Introduction to Ports

## Connecting to a device

## Connecting to a computer

The shortcut keys for output signals from different brands are different. See the computer manual for details.

(1) Press the windows key + P key on the keyboard and select "Copy".

Package Accessories	Instruction Manual, Remote Control,Cleaning cloth Power cord,3-in-1 AV Cable,HDMI Cable
Product Size	260 x 192 x 91 MM
Product weight	1.53KG

# Troubleshooting

As a high-tech product, the projector combined with optical, mechanical and electronic components and equipped with a protective and complicated circuit inside. To quickly solve your problems and to prevent improper using and settings, please follow operations below. If your problems or enquiries cannot be eliminated after reading the table, please do not hesitate to contact us.

Problem Description	Troubleshooting
The projector won't turn on	Check if the power source is the indicated one and the power cord is connected correctly. Make sure the power cord is not defective.
Lamp does not work after turning on the projector	Ensure power cord and power source are connected correctly. If the lamp gets damages, please contact us to replace the lamp
No images	Check whether the format and resolution of images are supported by the projector.
No response from remote control	Check whether batteries of the remote control run out or are installed correctly. Make sure there is no obstacle between the remote control and IR receiver. Always use the remote control within its effective distance (4m).
Obscure/Blurred images	Please rotate the focus ring, adjust the keystone and throw distance until the projected image is clear. Ensure the lens is clean.
Abnormal sound	Ensure the audio device is connected correctly and function well. Check if the mute or minimum volume mode is set.
