RE: Certification Application
Model: NINA-B306
IC: 26898-SENT001
FCC ID: 2AX9D-SENT001

Registered office:
StoneAge Inc.
466 South Skyline Dr
Durango, Co. 81303

Label location information for NINA-B306

The product label is affixed on the module shield cover as shown in Figure 1. The size of the label is 7.5 x 7.5 mm and contains the following information:
A data matrix formatted bar code, with unique serial number
Major and minor product version info
Product marketing name (e.g. NINA-B306)

Figure 1: Label location of NINA-B306

Figure 2: Actual size of the NINA-B306 identifier marking (7.5 x 7.5mm)

As the module is a surface mount device that is soldered onto the host it is not possible to place the label on the secondary side of the module

To be able to fit the FCC/IC certification number on the label the size has to be smaller than 4 points. Using such small font size makes the certification number too small to be readable. Therefore in accordance with CFR 47 §2.925 (f) and consistent with u-blox AG's original approval the FCC ID and ISCED Certification Number is not printed on the label, but instead placed in the user manual.

The manual also contains instruction on how to attach an auxiliary label on the end-product in compliance with the modular approval guidelines. The instructions will call attention to place the auxiliary label on an exterior surface of the device such that it will be visible upon inspection. The auxiliary label will have at least the information shown in Figure 3.
