RE: Long-Term Confidentiality Request for Multifunctional IoT platform sensor device, FBO-3001 with FCC ID# 2AXA8-FBO-3001

To Whom It May Concern:

This letter serves as an official request for confidentiality under sections §§ 0.457(d) and 0.459 of CFR 47. Trackconomy has requested that the **Block Diagram, Schematics, Internal Photos, Parts List/Tune Up Procedure, User Manual and Operational Description** required to be submitted with this application be permanently withheld from public review.

The above documents are company proprietary information that must never get into open resources online or in the possession of competitors. Circuit board and internal components are not accessible to users because of the permanent bonding/ fusing process at the factory. Requirement to be handled only by professional qualified personnel such as people working on restricted industrial sites or secured industrial plants which do not allow access of the product to any common public. We reviewed confidential information for the long term confidentiality agreement and we met the confidentiality requirements.

Please contact me if there is any information you may need.

Sincerely,

A handwritten signature in black ink that reads "Priyanka Jantre".

Priyanka Jantre
