To whom it may concern,

Subject: Request for confidentiality FCC ID: 2AXBF-VLU6M4SP

Kiwa Electrical Compliance Reference number: J14765

FCC inquiry tracking number 783654

Long-Term Confidentiality

Pursuant to 47 CFR Section 0.459(a) & (b), we hereby request non-disclosure and confidential treatment of the following materials submitted in support of FCC certification application:

- | | | |
|---------------------------|----------------------|---------------------|
| ✓ Bills of Material | ✓ Block Diagrams | ✓ User Manual |
| ✓ Operational Description | ✓ Schematic Diagrams | ✓ Tune-up Procedure |
| ✓ Theory of Operational | ✓ Internal Photos | x External Photos |

The above materials contain secrets, proprietary and technical information, which would customarily be guarded from competitors under 47 CFR, section 0.457 (d)(2). Disclosure or publication or any portion of this company confidential material to other parties could cause substantial competitive harm and provide unjustified benefits for competitors.

Further to this, we are specifically requesting Long Term Confidentiality to be applied to the User manual and Internal Photos, on the grounds that they contain proprietary technical information which, if made available for public viewing, could compromise the integrity of the product, its security and commercial success.

The product is used to fight against vehicle theft crime. It is covertly installed in a vehicle and is activated if the vehicle is stolen, thus enabling law enforcement agencies to detect and recover the vehicle. Having any of the product information (including the user manual and internal photos) in the public domain will give the vehicle thieves an advantage as they would be able to recognise, locate and devise methods that would render the product ineffective.

The User Manual is intended for professional installation technicians only, obligated under a NDA to keep the information secure.

An example of our NDA has been submitted along with the certification application. This NDA would be used when setting up agreements with installation partners, to ensure that such proprietary technical information is kept confidential.

Yours sincerely

A handwritten signature in blue ink that reads "P. J. Sanders".

Peter Sanders
