   Skill: The procedure manager installed by system has many convenient methods to uninstall after opening procedure manager, click uninstall, it will list all the application procedures installed by system.

8. Trouble Shooting

Before contacting the service center, you are advised to follow the instructions below:
• To have optimal operation, fully charge the battery.
• To improve the device's performance, remove unnecessary files or apps on your device.
• To update your system software, use the **System > updates** command in your device's settings.
• To set your device to factory default, use the **Reset options** in the device's settings. All your device data will be lost permanently. It is strongly advised to fully back up your device before resetting.

My device can't be switched on
• When the device can't be switched on, charge for at least 10 minutes to ensure the minimum battery power needed. Then switch it on again.

My Device has not responded for several minutes
• If your device doesn't respond, turn off your device by pressing and holding the Power key until it turns off and then restart it again.
• If your device has a removable battery, remove the battery and re-insert it, then restart the device.

My device turns off by itself
• When your device turns off by itself, make sure that the Power key is not accidentally pressed.
• Check the battery charge level.
• If it still doesn't work, Factory reset the device via the Reset options in the device's Settings. Make sure you have backed up your data.

My device can't charge properly

• Make sure that you are using the proper charger that comes with the device.

• If your device has a removable battery, make sure that your battery is inserted properly and the battery terminal makes a good contact with the device. It must be inserted before plugging in the charger.

• Make sure that your battery is not completely discharged; if the battery power has been discharged for a long time, it may take around 10 minutes to display the battery charging indicator on the screen.

• Make sure that charging is carried out under normal conditions (0°C (32°F) to 55°C (131°F)).

• When abroad, check that the voltage input is compatible.

• Check that the charging port is secured or it's not damaged.

My device can't connect to a network or "No service" is displayed

• Try connecting to the network by moving to another physical location.

• Verify the network coverage with your carrier in your current area.

• Check with your carrier that your SIM card is valid.

• Make sure your devices setting is not in airplane mode.

• If you are away from your carrier's network, you may need to enable roaming in the device's settings to connect to other network. Roaming charges may apply.

My device can't connect to the internet

• Make sure that Cellular Data internet service is available in your wireless service plan.

• Check your device's settings. Make sure Mobile network is enabled or Wi-Fi connected.

• Make sure that you are in a place with network coverage for cellular data or Wi-Fi internet connection.

• Try connecting at a later time or another location.

I can't send and receive MMS

• Check your device storage as it might be full.

• Contact your network carrier to check service availability and MMS parameters.

• Verify the server center number or your MMS profile with your carrier.

• The server center may be swamped. Try again later.

• Start a new Messaging string. You messaging string may have reached its limit.

SIM card PIN locked

• Contact your network carrier to obtain the PUK (Personal Unblocking Key) code.

I can't connect my device to my computer

• Install Smart Suite.

• Check that your USB driver is installed properly.

• Open the Notification panel to check if the Smart Suite Agent has been activated.

• Check that you have marked the USB debugging checkbox.

• Check that your computer meets the requirements for Smart Suite installation.

• Make sure that you're using the right cable from the box.

I can't download new files

• Make sure that there is sufficient device storage space for your download.

• Select the microSD card as the location to store downloaded files.

• Check your subscription status with your carrier.

The device can't be detected by others via Bluetooth

• Make sure that Bluetooth is turned on and your device is visible to other users.

• Make sure that the two devices are within Bluetooth's detection range.

The battery drains too fast

• Make sure that you follow the complete charge time (minimum 200 minutes).

• After a partial charge, the battery level indicator may not be exact.

• Wait for at least 10 minutes after removing the charger to obtain an exact indication.

• Adjust the brightness of screen as appropriate.

• Extend the email auto-check interval for as long as possible.

• Update news and weather information on manual demand, or increase their auto-check interval.

• Exit background-running applications if they are not being used for extended periods of time.

• Deactivate Bluetooth, Wi-Fi, when not in use.

The device becomes warm following game playing, internet surfing or running other complex applications

• This heating is a normal consequence of the CPU handling excessive data. Ending the above actions will make your device return to normal temperature.

After Factory data reset is performed, I can't use my device without entering Google account credentials

• After reset is performed, you must enter the original Google account credentials that were used on this device.

• If you don't remember your Google account credentials, complete Google account recovery procedures.

• If you still cannot access your device, apply to the authorized repair center, but remember that it will not be regarded as warranty case.

The device doesn't ring when a notification or message arrives

• Make sure that Do Not Disturb mode (go to Settings > Sound > Do Not Disturb preferences) is not activated.

• Press the Volume keys to adjust volume.

I forget some passwords/codes/keys on device

• Perform Factory reset.

• If you still cannot access your device, apply to the authorized repair center, but remember that it will not be regarded as warranty case.

9. Tech Specs

FCC Statement:
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
1) Reorient or relocate the receiving antenna.
2) Increase the separation between the equipment and receiver.
3) Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
4) Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
