Product Description

GreenTouch's industrial Android player box is an Android all-in-one touch solution designed and developed for automatic information systems, entertainment, and industrial automation control. Based on the concept of 'design for simplicity', it has the proven professionalism and reliability of GreenTouch. The precise and small integrated structure design requires no assembly, plug and play, and is easy to maintain and upgrade later. This model is designed and constructed by GreenTouch, has a long life cycle and can supply long-term demand.

The player box has a high-performance kernel, equipped with Android 6.0 system, supports 1080P decoding standard (maximum support 3840X2160 decoding), memory size optional (2G/4G), built-in storage standard 16G (32/64G optional) ; The network supports WIFI/Bluetooth 4.0, 3G/4G, wireless peripheral expansion, supports a variety of built-in PCI-E 3/4G modules such as Huawei, Longshang, and 12V low-voltage power supply. The standard ports include 2 USB ports, a Gigabit wired network card interface, a 3.5MM audio output port, and an HDMI video output port.

The player box can perfectly support a variety of mainstream touch screens such as capacitive touch mode displays, resistive touch mode displays, and infrared touch displays. This model has global regulatory agency certification (UUL, cUL (Recognized), FCC, CE, CB, China RoHS CQC), and GreenTouch warranty and after-sales service. It is a cost-effective integrated touch solution for industrial embedded system integrators and value-added distributors (VARs).

FCC WARNING:

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
