

English (英语)

# Read the manual before use

**Important:** Plug in the charging wire for charging at the first time after receiving the goods, and use it after fully charging, which can make the Wireless earphone last longer

**Important:** Do not use super fast charging with current above 2A to avoid damaging the circuit chip due to excessive current

**Indicator light:**  
When the earphone is charging, the white light is on, and the white light is off when it is full.  
There will be a white breathing light when the charging bin is charging, and the white light will be on all the time after it is full.

Turn on Wireless on your mobile phone, search for "SP39" devices and click on the connection.

Press and hold for about 5 seconds to turn on/off.

**The touch control position of the earphones is within the white circle.**

If only one earphone has sound, please delete the connected "SP39" first, turn off the wireless function of the phone, the earphone needs to be paired once, enter the tws mode, and then return to the first step

## The connection steps are as follows:

TWS connection: The earphone will automatically turn on and automatically pair.  
(When the TWS is successfully paired, the left and right earphones turn into synchronous white and green slowly blinking, and the light goes out after the mobile phone is successfully connected)

## Touch function

1. Short press to play, pause, answer or hang up the call
2. Press and hold to reject the call
3. Double tap Call back
4. Three hits left/right earphone volume +/- volume -
5. Four taps on the left earphone activate Siri and touch it once to exit Siri
6. Four clicks on the right earphone to change to music/game mode
7. Press and hold left/right earphone for 1.5 seconds: Previous/change song

The power delivered by the charger must be between min 2.5 Watts required by the radio equipment, and max 10 Watts in order to achieve the maximum charging speed.

### FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:  
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
