Green light	Always on	Fully charged
Orange light	Flashing (5 seconds)	Low battery protection (<3%)

03/ Other conditions：

Blue light	Flashing	OTA upgrade in progress
Red light	Flashing	Error alert

Replacing the headband

① Removal: Hold one of the front sides of the device and gently break the soft headband outwards by the other side. Hold the main unit module from the side and remove it.
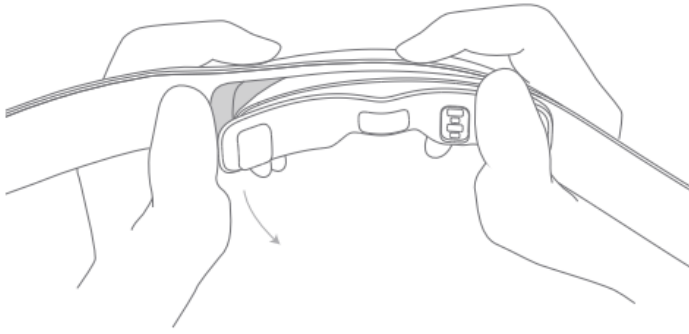

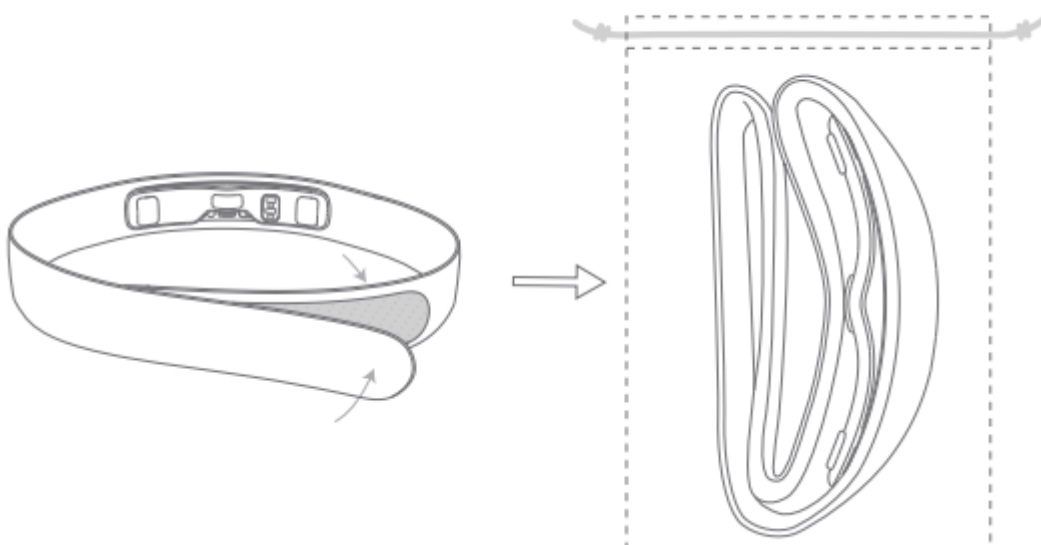

② Installation: Hold the main unit module squarely close to the headband cavity and automatically attach it (make sure the headband is oriented in the same direction as the main unit module).
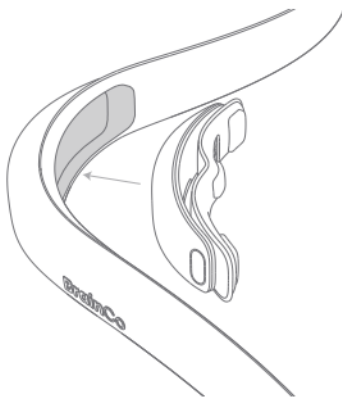

Device storage
① Fasten the headband with the Velcro and fold it left and right.
② After folding, place in the included storage bag and tighten the closure.

Product Specifications
Device name: Portable EEG feedback device
Model Number: ZS-11
Dimensions: 110mm*22mm*32mm
Weight: 60g

Battery capacity: 90mAh
Charging time approx.: 2 hours
Battery Operating Time: 8 hours
Connectivity: Low power consumption Bluetooth technology
Charging interface: USB-C

Instructions for wearing the device

① Ensure that the device is held in a positive position (with the charging port facing downwards), hold the middle of the device with both hands and place it centrally on the forehead.

❗ To ensure accurate signal measurement, wipe with a damp paper towel before wearing.

Charging port facing downwards
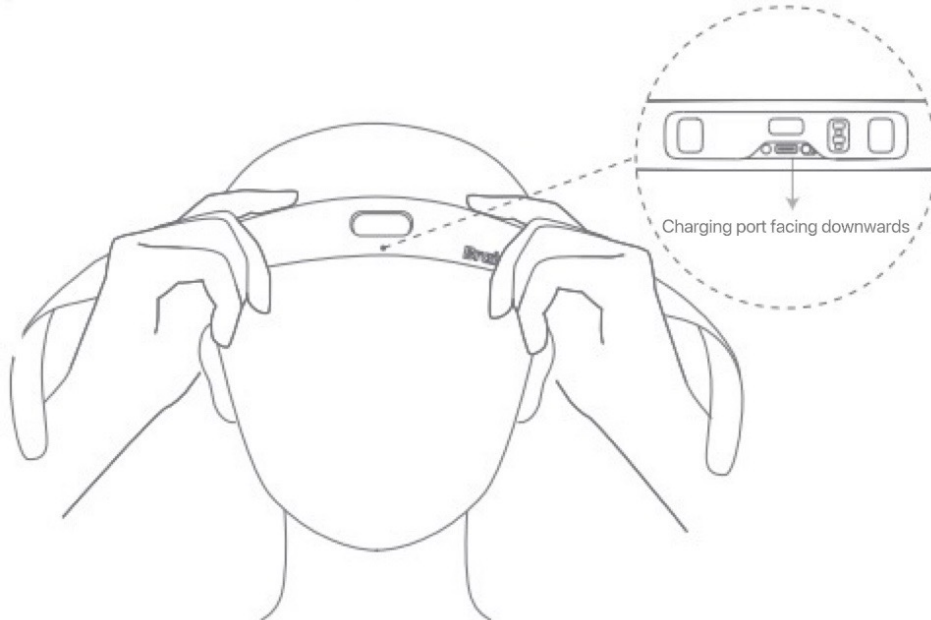

② Tighten the sides of the headband appropriately for wear and adjust the device to the appropriate position, ensuring that all electrodes and sensors are in full contact with the skin (No hair in the way).

Electrodes in contact with skin
