

Quick Start Guide

- 1 Download the Glowe App.
[Download on the App Store](#)
- 2 Create your user account.
- 3 Check the settings on your phone. Glowe listens for notifications from Twitter, Instagram, Snapchat, and Facebook. It will also alert you of new Text Messages and Calls. Make sure you check the Notification Settings for each. If any are turned off, your device won't know to activate. These are the minimum phone settings we suggest for Glowe to deliver your social notifications.

4 Meet the Glowe Dashboard

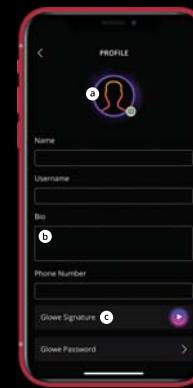

- a Connect your device
- b Set up your profile
- c Hold for Light Show
- d Manage your contacts
- e Customize your alerts
- f Glow Code manager
- g Chat with friends
- h Shop the Glowe store
- i Rename your device
- j Answers to questions

5 Set Up Your Glowe Profile

- a Upload an image
- b Be creative with your bio
- c Glow Signature

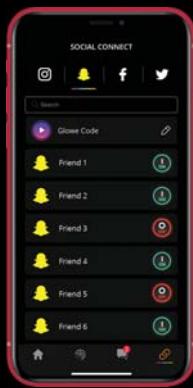

A Glow Signature is the combination of vibration and light that represents you. First choose your vibration and then pick three different light colors and pattern designs. You can play your signature at any time here or with a single tap on the Glow logo on the dashboard.

6 Glowe Social Connect

Glowe automatically listens for activity on four social platforms and will notify you on your device based on your Glowe Code settings. You can also choose to customize a Glow Code for each so you will know where the notification came from.

Glowe will learn who your friends are, who you follow and will list them here. If you don't want a friend to activate your Glowe device with a notification, simply toggle them Off.

7 Secret Glove Codes

Imagine receiving a unique notification on your Glove device and knowing who it's from and what it means just by the custom combination of vibration and light. That's the purpose of sending and receiving Secret Glove Codes.

To create a new Glove Code, type the message at the bottom of the repeat, assign a vibration and three different light and color patterns. Save it and send it to friends. Your app will remember any Glove Codes that you send and any that you receive. You will also find them in your chat history.

8 Glove Code Messaging

Unique to Glove is the ability to chat with text messages or unique Glove Codes. Quickly send a saved Glove Code or create a new one by pressing the Glove logo, select it from your saved list and it immediately sends and plays on your friend's device. When you receive one from a friend, it will appear in the chat and immediately play on your device. To help you learn the message of the Glove Codes, you can easily replay them in your chat or in the Saved and Received Glove Code screen.

9 Phone Alerts / Notifications

Your Glove device can also play custom alerts for calls, texts and timers. Like Social Connect, you can toggle Phone Alerts on and off. Choose a custom vibration, sound and light pattern. Preview the alert on your Glove device and Save your changes.

Glove Button Functions

Your Glove device will arrive powered off - one short press will power it on and will be confirmed by a green Glove logo crossing the light array.

Power your Glove device off by pressing the button for 5 seconds - success is a red Glove logo crossing the light array. When powered on a single press will show the battery level. And two quick presses will send the light array into Light Show mode.

Glove Warranty Coverage

Your Glove Social Wearable comes with a 110V AC power adapter. For the duration of the warranty period, GoGlove warrants the product against defects in materials and workmanship, arising from normal use of the product. If there is a material defect in the product which is covered by this limited warranty, GoGlove, Inc. will repair or replace the product with a new equivalent product. This is the sole remedy available for breach of warranty.

For warranty service and to obtain return instructions, please contact customer support. No product can be returned for warranty without an RMA number. To obtain service under the limited warranty, you will be required to return to GoGlove, Inc. with the original proof of purchase.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
