C5

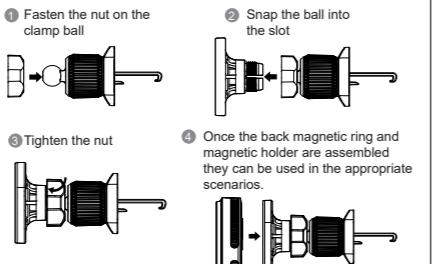

USER MANUAL

Functional component

Working Process

Lighting mode

Mode	Indicator light
Power on	Color light slowly rotates after running two laps
Standby	Color lights rotate slowly, or single color lights stay on
Charging	Color lights rotate slowly, or single color lights breathing, fan cooling works simultaneously
Full charge	Color lights rotate slowly, or single color lights stay on, fan cooling stop working
Foreign Object Detected	The red light flashes quickly for 5 seconds and turn off, but recovers after removing foreign objects

Button Function Description

Mode	Function
Single click	Switch lights (rainbow slow rotation, ice blue light stay on, purple light stay on)
Double click	Turn off/on the lights
Long press for 3S in charging status	Can turn off wireless charging and act as a magnetic heat radiator. (The refrigeration and fan continue to operate, the indicator light turns green and breathing status)
Long press for 3S in standby mode	Restart wireless charging function, cooling and fan operation, color light rotate slowly. (When the power is less than 9W, only the fan is working)

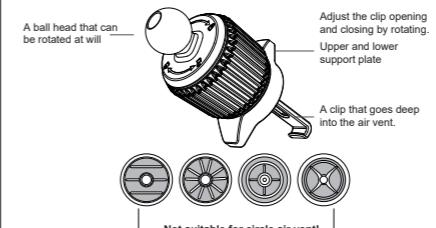

Performance Overview

1. The maximum charging power of this product is 25W, and the charging efficiency may vary depending on the charging environment and the phone.
 2. When the cooling and fan are running simultaneously, the temperature in the charging area decreases, which efficiently cools down the phone; It is normal for the temperature on the back of the machine to slightly increase, when the heat generated by the operation of the semiconductor and discharged outward by the cooling fan.
 3. The best distance of wireless charging is within 4mm, and it cannot penetrate metal, so it is necessary to avoid using metal or too thick (over 4mm) mobile phone case, so as to ensure fast wireless charging of mobile phone.
 4. If the phone does not support wireless charging or detects a metal object, the red indicator light will flash for 5 seconds before turning off.
 5. After the phone is removed from the product, the indicator will immediately show the standby status. When the car engine off and the power supply stops, the indicator light goes off. The mobile phone is still attached to the product by magnetic force and can be taken off at any time.

Product specification

Model: C5
 Input: 5V-3A/9V-3A/12-3A/15-3A (QC3.0 /PD)
 Output power: 5W, 7.5W, 10W, 15W, 25W (Max)
 Working temperature: 0°C ~ 40°C
 Induction distance: ≤4mm
 Magnetic attraction: 1.6KG

Air vent mount

Adjust the position of the top piece of the air outlet and the rotatable clip assembly according to the position of the air outlet blade; insert the blade and select the lock switch position according to the thickness of the blade; suitable for one-key locking of the air outlet of most cars. Silicone touches the car, tighter and fits better to protect the car from scratches.

Caution

1. For smartphones that are not magnetic, please add a magnetic ring before using this product.
2. Do not over squeeze or collide with the equipment.
3. Please do not place it too close to the magnetic card (ID card, bank card, etc.) with magnetic stripe or chip to avoid magnetic card failure.

Package

Wireless charger*1
 Magnetic Holder*1
 Air vent mount*1
 Type-C cable*1
 User manual*1

Warranty

The three guarantee period of this product: from purchasing date (Prevail to the customer receipt date or invoice date), provide 12 months guarantee, product surface man-made damage, accessories missed are not include in this guarantee, repair service for the product is out of the guarantee period or not covered by warranty, customer need to pay the repair charge.

FCC Warning
 This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC RF exposure statement:

The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance between 20cm the radiator your body.
