KNOW YOUR PRODUCT

- ① CPI + / - Adjustable
- ② Function Indicator
- ③ Type-C Input Port
- ④ Power Switch
- ⑤ 2.4G Receiver Storage

CPI ADJUSTABLE

Press the CPI +/- button to switch between the default resolutions: 400, 800, 1000, 1200, 1600, 2,000 CPI. Adjustable via software: 50 ~ 20,000 CPI.

Indicator	Default Resolution
	400 CPI
	800 CPI
	1000 CPI
	1200 CPI
	1600 CPI
	2000 CPI

*If the CPI button is not clicked for 15s, the indicator will turn off automatically.

CONNECT 2.4G NANO RECEIVER

- ① Turn the mouse power switch on.
- ② Press to pop up the lid. Take out the Nano Receiver and put the lid back.
- ③ **Laptop Use:** Plug the receiver into the laptop's USB port or use the Type-C adaptor to connect the receiver to the laptop's Type-C port.
- ④ **Desktop Use:** Use the adaptor to connect the nano receiver to the USB Type-C cable, then plug it into the desktop for wireless signal anti-interference.

CONNECTING USB WIRED

The mouse will switch from wireless to wired mode when the USB Type-C cable is connected. **Note:** While in wired mode, the mouse charges simultaneously.

FIRMWARE UPDATE OPERATION

Ensure the USB connection is not interrupted during the update process.

- ① Plug both of mouse and dongle in the USB port.
- ② Confirm that the mouse and nano dongle are online simultaneously.
- ③ When prompted to upgrade the firmware, click the Upgrade button to complete the process.

Wireless Re-pairing Operation:

- ④ Plug in the mouse and dongle, then click the Pair Code button to re-pair.

Note: Only newly purchased USB Nano receivers need to be re-paired.

Q&A

Question When connected in 2.4G wireless mode, the mouse sometimes lags. How can I fix this?

Answer Check the following:

1. Ensure the USB Nano receiver is connected to the adaptor and the USB Type-C cable is properly plugged in.
2. Make sure the wireless environment is within 30-100 cm, without obstacles or metal objects.
3. Ensure there are no strong wireless routers or other interference sources within 1 meter.

Q&A

Question Wireless 1000Hz transmission is smooth like wired. Can I achieve the same with 500Hz?

Answer 1000Hz wireless transmission has a 1ms response time, whereas 500Hz has 2ms. Choose the appropriate report rate based on your gaming needs.

Question How many wireless devices can be used in the same environment?

Answer We recommend using 10 units or fewer. For more than 10 units, maintain a distance of 1.5m to 3m between them.

Q&A

Question Will other wireless devices at home cause interference with my mouse?

Answer This mouse features advanced anti-interference technology:

1. Excellent interference resistance, transmitting four times within 1ms (conventional products transmit once).
2. Intelligent frequency hopping to dynamically adjust power (0-6dB), reducing the need for hopping (conventional products have fixed power).
3. The USB anti-interference extension cable creates a clean wireless environment (reducing metal and obstacle attenuation).

TECH SPEC

Sensor:	Alpha 20K Engineered Engine
Wireless Transmission:	1ms
Operation Range:	10 m
Default Resolution:	400-800-1,000-1,200-1,600-2,000 CPI
Adjustable by Software:	50~20,000 CPI
Frame Speed:	Self-Adjusting
Adjustable by Software:	Self-Adjusting
Acceleration:	40 G
Tracking Speed:	350 IPS
Report Rate:	1000Hz Adjustable
Battery:	300 mAh Lithium Battery
Charging Time:	≤ 1.5 Hours
Playtime:	≤ 75 Hours
Micro-Switch:	Over 30 Million Clicks (Left / Right Button)
Wheel:	Over 800,000 Scrolls
USB Type-C Soft Braided Cable:	180 cm
Size:	125 x 63 x 40 mm
Weight:	70 g (w/o cable)

WARNING STATEMENT

The following actions may cause damage to the product:

1. Disassembling, bumping, crushing, or throwing into the fire can cause irreparable damage due to lithium battery leakage.
2. Avoid exposing to strong sunlight.
3. Follow local laws for battery disposal; recycle if possible. Improper disposal may cause fire or explosion.
4. Avoid charging in environments below 0°C.
5. Do not remove or replace the battery.
6. Do not use chargers with outputs from 6V to 24V. Use a 5V charger to avoid damage.

CHARGING & INDICATOR

INDICATOR

Q & A

Question How to switch wireless or wired mode?

Answer Plug in the USB cable to connect with wired mode.
Plug in the 2.4G nano receiver to switch to wireless mode.

Question When connected with 2.4G wireless mode, the mouse occasionally experiences intermittent lag. How can I solve this problem?

Answer Please follow the steps below to check.

- Whether the receiver is inserted in the USB anti-interference extension cable seat.
- Whether the wireless environment is used within 30~100cm, and no obstacles and metal objects cover.
- Whether there is a strong power wireless router or other wireless transmitter interference source within 1 meter around.

Q & A

Question Wireless 1000Hz transmission is smooth and like wired, can I achieve the same effect with 500Hz?

Answer The wireless transmission of 1000Hz is 1ms, while for 500Hz is 2ms. The players can select the proper report rate during the game experience.

Question Is there a maximum number of wireless products that can be used in the same environment?

Answer We recommend 10 units or less. (For more than 10 units, it is recommended to be 1.5m~3m apart)

Q & A

Question There are some wireless devices at my home. Will this cause signal interference when I use the mouse via wireless mode?

Answer This wireless mouse has powerful wireless anti-interference technology as follows:

- Excellent anti-interference, transmit four times in 1 ms. (Conventional wireless products transmit only one signal)
- Intelligent frequency hopping mechanism, the same frequency interference can be dynamically adjusted to transmit power 0 ~ 6db, reducing the need for wireless frequency hopping. (Conventional wireless products are fixed transmission power)
- With USB anti-interference extension cable can create a clean wireless environment. (Reduce the attenuation of metal and obstacles on the wireless performance)

TECH SPEC

Sensor: PAW3313 Gaming Optical Engine
Wireless Transmission: 1ms
Operation Range: 10 m
Default Resolution: 1000-1200-1600-2000-3200 CPI
Adjustable by Software: 100~12,000 CPI
Frame Speed: Self-Adjusting
Acceleration: 35 G
Tracking Speed: 300 IPS
Report Rate: 1000Hz Adjustable
Wireless Transmission: 1 ms
Micro-Switch: Over 20 Million Clicks (Left / Right Button)
Wheel: Over 800,000 Scrolls
USB Type-C Charging Cable Length: 180 cm
USB Extension Dock Cable Length: 120 cm
Size: 130 x 70 x 39 mm
Weight: 89 g (w/o cable), 126 g (w/ cable)
Color: Stone Black

WARNING STATEMENT

The following actions may/will cause damages to the product.

- To disassemble, bump, crush, or throwing into fire, you may cause irrefutable damages in event of the lithium battery leakage.
- Do not expose under the strong sunlight.
- Please obey all local laws when discarding the batteries, if possible please recycle it. Do not dispose it as household garbage, it may cause a fire or an explosion.
- Please try to avoid charging in the environment below 0°C.
- Do not remove or replace the battery.
- Forbidden to use 6V to 24V charger, otherwise the product will be burned. Recommended to use a 5V charger for charging.

FCC regulatory conformance:

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a **Class B** digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

RF Exposure

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.
