

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of an Electronic Under Test (EUT) housing. A black plastic housing is open, revealing a green printed circuit board (PCB) with a circular copper coil and various electronic components. A black ruler with white markings is placed horizontally below the housing for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
EUT Housing and Board View 2	 A photograph showing the internal components of an Electronic Under Test (EUT) housing from a different perspective. The black plastic housing is open, revealing a green printed circuit board (PCB) with various electronic components. A black ruler with white markings is placed horizontally below the housing for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).

Solder Board-Component View 1	 A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 1'. The component is rectangular with various electronic components soldered onto it, including a large black integrated circuit (IC), a red electrolytic capacitor, and several smaller surface-mount components. It is positioned next to a black ruler with white markings in millimeters, showing its size. The ruler is oriented vertically, with the component's length spanning from approximately 10 mm to 70 mm.
Solder Board-Component View 2	 A photograph of the same green PCB component, labeled 'Solder Board-Component View 2'. This view shows the reverse side of the component, revealing the solder pads and the underside of the components. It is also positioned next to a black ruler with white markings in millimeters, showing its size. The ruler is oriented vertically, with the component's length spanning from approximately 10 mm to 70 mm.

Solder Board-Component View 3	 A photograph of a green printed circuit board (PCB) component, labeled '3', showing its top surface. The board is populated with various electronic components, including a large black integrated circuit (IC) in the center, a silver-colored component on the right, and several smaller components and surface-mount devices. The board is placed on a black background with a white ruler for scale. The ruler shows dimensions in millimeters, with markings from 0 to 100 mm.
Solder Board-Component View 4	 A photograph of the same green PCB component, labeled '4', showing its bottom surface. The board features a large silver-colored component on the left and a central area with a complex pattern of solder and components. The board is placed on a black background with a white ruler for scale. The ruler shows dimensions in millimeters, with markings from 0 to 100 mm.
