Solder Board-Component View 8	 A photograph showing a small green printed circuit board (PCB) component mounted on a blue textured surface. The component is positioned next to a black ruler with white markings. The ruler has two scales: a vertical scale on the left and a horizontal scale at the top. The vertical scale is marked in millimeters from 0 to 100, with '0' at the top and '100' at the bottom. The horizontal scale is marked in millimeters from 0 to 100, with '0' on the left and '100' on the right. The component is located between the 10 mm and 20 mm marks on the vertical scale and between the 40 mm and 50 mm marks on the horizontal scale.
Solder Board-Component View 9	 A photograph showing the same green PCB component from a different angle. The component is mounted on the same blue textured surface. The black ruler with white markings is visible, showing the same vertical and horizontal scales as in the previous image. The component is positioned between the 10 mm and 20 mm marks on the vertical scale and between the 40 mm and 50 mm marks on the horizontal scale. The component's label, which reads 'WALTEK WTX21X06063019W-1', is visible on the top edge of the component.

Solder Board-Component View 10	 A photograph showing a small electronic component, likely a microcontroller or sensor, mounted on a blue printed circuit board (PCB). The component is positioned near a black ruler with white markings. The ruler shows measurements in millimeters (mm) and centimeters (cm). The component has a yellow label with the number '15' and other markings. The background is a blue textured surface.
Solder Board-Component View 11	 A photograph showing a small electronic component, likely a microcontroller or sensor, mounted on a blue printed circuit board (PCB). The component is positioned near a black ruler with white markings. The ruler shows measurements in millimeters (mm) and centimeters (cm). The component has a yellow label with the number '15' and other markings. The background is a blue textured surface.
