**Precautions**

Placement: it is recommended that when you do not use your headphones, you should put it in a place that will not squeeze it, squeeze may result in product damage or personal injuries.  
Children: do not allow children to play with headphones, because some small parts are removable and children are dangerous if these parts are swallowed.  
Please listen to music at a moderate volume to prevent adverse effects on your hearing.  
Please wear it carefully when driving or cycling, so as not to affect driving safety such as product parameters and specifications. Subject to change without notice.

**4. Shape and function buttons**

When the product is out of the factory, the left and right earphones are paired successfully by default. When connecting to the mobile phone for the first time, follow the following steps to operate:

1. When the power is off, take out the headphones and tap them on automatically (the red and blue lights turn on alternately, after the blue lights turn on, wait for about 3 seconds before the headphones will turn on automatically).  
Red and blue lights flashing in the main ear and off in the auxiliary ear.  
2. Open Bluetooth: search "Lenovo XE05" and click to connect. When the pairing is successful, you will hear "connected" and mobile phone connection.  
When used again, the headphones will automatically connect back to the connected cell phone after they are paired on. If you can't connect to the phone, please use Bluetooth to connect to the headset manually. In the course of use, any ear is put back to the other side of the charging bin without being affected.

\* No equipment is connected to the base, and it will shut down automatically after 3 minutes.  
\* In headset, only the main ear will connect to your device, and the accessory ear will connect to the main ear.  
\* When using alone, both left and right headphones can be used as separate mono headphones.  
Neckband headset pairing:  
Pick up the earphone from the charging base, turn on both ears automatically, and enter the left and right ear matching mode automatically.  
\* If the pairing is unsuccessful for a long time, please put back the left and right earphones to the charging bin and pick them up.

**2. Charging**

• Connect the power adapter to charge with the charging line provided inside the packing box of the product.  
• When charging, the power indicator flashes, and when the power indicator is always on, the headset is fully charged.

In order to meet the laws, regulations and other requirements related to the restriction of hazardous substances in China's electronic and electrical products, Lenovo classifies the hazardous substances in this product according to the parts, and makes the following statement:

Component Name	Hazardous substances					
	lead (Pb)	mercury (Hg)	cadmium (Cd)	cr (Cr (VI))	PBBs (PBB)	PBDEs (PBDE)
Printed circuit assembly	X	0	0	0	0	0
Solder and other small structural parts	X	0	0	0	0	0

This form is prepared in accordance with SJ/T 11364.  
C: Indicates that the content of the hazardous substance in all homogeneous materials of the part is below the limit requirements specified in GB/T 26572.  
X: Indicates that the content of the hazardous substance is at least one.  
Homogeneous material of the component exceeds the limit requirements specified in GB/T 26572.  
The components marked with "0" in the table are unable to realize the reduction of hazardous substances due to the limitation of global technology development level.  
Printed circuit board components include printed circuit board and its parts, electronic components, etc. depending on the product model, the products you purchase may not contain all of the above components.  
The electronic and electrical products sold in the territory of the people's Republic of China must be marked with this sign, and the number of the sign represents the environmental protection service life of the product under normal use.

**FCC Statement**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If the equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

**RF Exposure Information** The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
