

Specification

Material: Stainless Steel, PCTG semi-transparent oil cup

Size: 20mm*20mm*96mm

Pod Capacity: 3.5ml

Resistance: 1.2+0.1/-0.1Ω

Voltage: 3.2-4.2 V

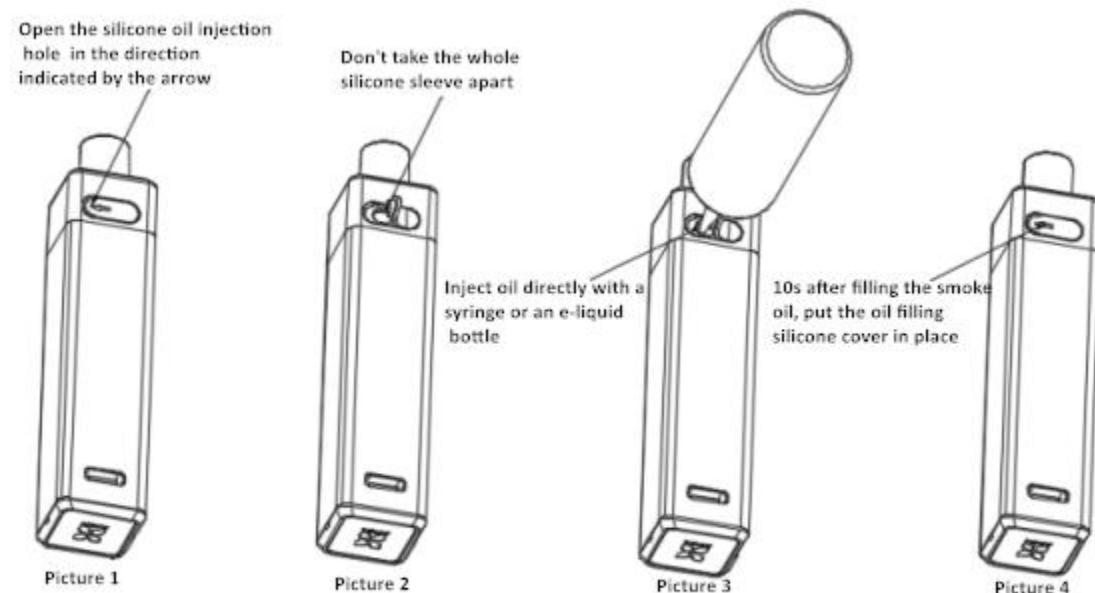

Battery Capacity: 850mAh

User Guide

Usage and instructions

Refer to (use graphic)

Open the silica gel in the direction indicated by the arrow in Figure 1, and do not remove the entire silica gel, as shown in Figure 2. Use a syringe or an e-liquid bottle to align the oil injection hole for oil injection, as shown in Figure 3. It takes 10 seconds after the e-liquid is filled Cover the silicone to prevent oil leakage, as shown in Figure 4

Oil filling diagram

Bluetooth instructions:

1. Bluetooth activation connection: activated when charging (activation for the first time or when the phone is replaced), when the charging cable is plugged in to activate the Bluetooth connection, the mobile phone APP software opens the pairing, the red and blue LED lights alternately breathe, and the blue light is always on after the connection is turned off for 3S Means connected
2. Bluetooth adjustment power: between 5-11W, Bluetooth adjustment power, with 1W as the gear. After adjusting the power level on the mobile phone APP, the LED light corresponding to the current battery will breathe for 0.5S
3. Charging method: When the TYPE-C line is plugged in, the LED light will indicate the breathing during the charging process. When the voltage is less than 3.7V, the red light will indicate the breathing. When the battery voltage is greater than 3.7V, the blue light will indicate the breathing, and the blue light will always be on when the battery is fully charged.

4.Storage and Others

Long Time Storage

- Products stored for a long time (more than 3 months) must be placed in a dry and cool place. Temperature: $20\pm5^{\circ}\text{C}$ Relative humidity: $65\pm20\%\text{RH}$
- Do not leave it in a high temperature environment for a long time during use, as it will easily cause the taste of the atomized liquid to change and oil leakage.

When standing upside down, the smokeless oil should be stopped to avoid scorching.

Handling Instructions

Do not leave it in a high temperature environment for a long time during use, as it will easily cause the taste of the atomized liquid to change and oil leakage.

When the e-liquid visibility is lower than the nozzle level, a second oil injection is required to avoid scorching;

Due to the limited life of the atomizing core, the product is set to 3 repetitive oiling times in terms of the number of oil injections. If more than 3 times, oil leakage and taste deterioration will occur.

Caution: The user is cautioned that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Supplier's Declaration of Conformity

Product name: AXON M

Model number: Larg pro 01-C

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
