

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Radiation Emission Test Setup (Below 30MHz)	 A photograph of a radiation emission test setup for frequencies below 30 MHz. The setup is located inside an anechoic chamber, characterized by its walls, floor, and ceiling covered in white, square-shaped electromagnetic absorbers. A yellow, rectangular test item is placed on a circular turntable. The turntable is supported by a dark blue metal frame. The floor of the chamber has yellow and black diagonal hazard stripes.
Radiation Emission Test Setup (30MHz to 1GHz)	 A photograph of a radiation emission test setup for frequencies from 30 MHz to 1 GHz. The setup is inside an anechoic chamber with white absorber walls. A yellow test item is on a circular turntable. In the foreground, several vertical metal poles are visible, likely part of a probe stand or antenna array used for higher frequency testing. The floor has yellow and black diagonal hazard stripes.

**Radiation Emission Test
Setup (1GHz to 18GHz)**
