This product supports fast wireless charging and conforms to Qi wireless charging standard; short-distance radio energy transmission is realized through magnetic induction. This device supports all wireless charging devices conforming to Qi standard. When 5V output adapter is used, the wireless

charger supports 5W load. When adapter of QCQ2.0 or above is used, the wireless charger supports 10W load. It is featured installation. If this equipment does cause harmful interference to radio or with overcharge protection, Overvoltage protection (9V) and overcurrent protection (2A)

[IMPORTANT NOTES]

• Do not use or store the product in the place of direct sunlight or high temperature for a long time. • Do not charge the product in the place where is too close to the magnetic recording medium of the magnetic card and the precise nstrument. • Do not disassemble or modify the product.

• Do not touch the AC adapter with wet hands. • Keep this product away from water or other liquids. • Disconnect the power when clearing the product.

• Working temperature range of the product.

FCC statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more

of the following measures: Reorient or relocate the receiving antenna.

• Increase the separation between the equipment and receiver. • Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. • Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement. The antennas used for this transmitter must be installed to provide a separation distance of at least 20cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter.
