

## **1. First use**

- 1) Please open the charging box, take out the earphones, and tear off the insulation sticker at the end of the ear handle, then put the earphones back into the charging box and close it.
- 2) Please connect the power supply to charge, and then use it after fully charged.
- 3) Please use the charger below 5V-2.1A to charge

## **2. Low latency game mode**

Turn on the game mode: triple-click the right headset to enter the game mode, and the voice prompt "gaming game mode"

Turn off the game mode: repeat the above method once

## **3. Easy pairing**

- 1) When the smart device is connected to the headset for the first time, open the top cover of the charging box, and the headset will automatically power on and enter the binaural interconnection mode. You need to wait about 3-5 seconds until you hear the prompt "pairing ready to pair" to enter the pairing state with the smart device;
- 2) Open the Bluetooth list of the smart device, select and connect the headset with the device name "GM600". In binaural mode, only one model name will appear.
- 3) After the first connection is successful, remove the headset from the charging box, and the headset will automatically connect back to the device that was successfully connected the last time. If you want to use one earphone alone, just take out one of them.

#### **FCC STATEMENT :**

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

**Warning:** Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

#### **RF warning statement:**

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
