### FCC Caution

This device complies with part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
- (2) this device must accept any interference received,  
including interference that may cause undesired  
operation.

Any Changes or modifications not expressly approved  
by the party responsible for compliance could void the  
user's authority to operate the equipment.

Note: This equipment has been tested and found to  
comply with the limits for a Class B digital device,  
pursuant to part 15 of the FCC Rules. These limits are  
designed to provide reasonable protection against  
harmful interference in a residential installation.

This equipment generates uses and can radiate radio  
frequency energy and, if not installed and used in  
accordance with the instructions, may cause harmful  
interference to radio communications. However, there  
is no guarantee that interference will not occur in a  
particular installation. If this equipment does cause  
harmful interference to radio or television reception,  
which can be determined by turning the equipment off  
and on, the user is encouraged to try to correct the  
interference by one or more of the following measures:  
-Reorient or relocate the receiving antenna.  
-Increase the separation between the equipment and  
receiver.

- Connect the equipment into an outlet on a circuit  
different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV  
technician for help.

This equipment complies with FCC radiation exposure  
limits set forth for an uncontrolled environment.

This equipment should be installed and operated with  
minimum distance 20cm between the radiator & your  
body.
