Electric Drill

• 2.4GHz wireless network signal available at the installation location Connectivity & Security

802.11 B/G/N20

- Channels 1 to 14 at 2.4GHz (CH1-11 for US/CA,CH1-13 for EU/CN) Support WEP/WPA/WPA2/WPA2 PSK (AES) security modes
- Product Warranty: 2 Years
- Product Dimensions • Controller Size: 6.1"*4.7"*1.5" Product Weight: 224g

04 INSTALLATION STEPS

Before installation, ensure that the device can connect to WiFi without

Step 1: Download the APP

Search the keyword "HiOazo" in App Store or Google Play, or scan the QR code to download and install the APP. Create your account once the App is installed.

Step 2: Connect to Wi-Fi

Plug the device into a power socket, and the LED light will fully light up for one second. After waiting for 5 seconds, the 🛜 indicator light will flash, indicating that the device has entered the WiFi connection state. If the ? indicator light does not flash, press and hold the 🛜 button for two seconds to reset the WiFi

Open the HiOazo app and click "+" on the top right corner to add a device. Then, follow the app instructions to complete the Wi-Fi connection. Note that this controller only supports 2.4GHz Wi-Fi networks. After the connection is successful, the 🛜 indicator on the controller will always be on.

Congratulations! You have successfully connected the product to WiFi! Please follow the steps below to complete the installation.

Step1: Remove your old controller

Step 2: Mark Screw Locations

under 6 feet (1.8 meters).

First, test your old controller to make sure it can work properly. Then use the included label stickers to mark all the lines you have connected. Finally, remove the old controller.

1.Please make sure the distance between the device and the power socket is

2.Use the mounting template to mark the location for installation. Then use the

electric drill to drill holes in the marked mounting locations. Finally, use the

hammer to install the screw anchors to the wall.

Hang your new controller on the nut. Then secure the controller with two screws at the bottom.

nut and the wall for hanging the controller.

3. Secure the top screw. Pay attention to leave a proper distance between the

Step 4: Wire Connection

Attach the labels for the marked wires to your new device.

C Common Wires Common port is usually marked with C. A common wire can be inserted into any wire hole marked with C.

Mater/Pump Valve(optional)

1.Master Valve

The master valve is usually marked with M. If the master valve is required, it

HíSazo

2.Pump Valve

Connect an optional pump start replay to the controller. Water pumps are used to extract water from wells or other water sources. If you want to start up the water pump of the controller, you must install a pump start relay. The connection method of the pump start relay and the controller is the same as that of the main valve, but the connected water source is different.

The controller does not provide the main power supply for the water pump.

Zone wires correspond to the areas to be watered, which should be inserted into the labeled number.

11

S 24VAC-Sensor Wire (optional)

You can connect one rain sensor to the ports marked with S and 24VAC-.

Congratulations! You are now ready to use the new controller! Let's start a new

Start/Skip Button

Manual Watering

Press the button to enter the setting mode, and the indicator lights of each channel are on. When setting channel one, the indicator of channel one flashes. Press the 🛜 button to cancel the manual irrigation of that channel and enter the setting of the next channel. Press the 😝 button to confirm the setting and advance to set the next channel. Press the Dutton to exit the setting and start irrigation, and press the 🕟 button again to skip or end irrigation.

Skip Watering

During watering, press **D** to cancel watering in this zone.

07 FCC Requirement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

15

(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference

that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and

 Reorient or relocate the receiving antenna. Increase the separation between the equipment and receiver. - Connect the equipment into an outlet on a circuit different from that to which

the receiver is connected. - Consult the dealer or an experienced radio/TV technician for help. This equipment complies with FCC radiation exposure limits set forth for an

on, the user is encouraged to try to correct the interference by one or more of

uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator & your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

08 CUSTOMER SERVICE

the following measures:

This item carries a 2-year warranty against defects in either components or workmanship. During this period, products that prove to be defective will, at the discretion of HiOazo, be either repaired or replaced without charge. For any problems in use, please feel free to contact us at support@hioazo.com. We will do our best to help you.
