

USER INSTRUCTION

Wi-Fi dual mode

Product Overview

- 1.Built-in MEMS microphone, real-time acquisition of music and environmental sound intensity.
- 2.LED Strip Light sync to music , contains a variety of musical rhythm modes.
- 3.Infrared Remote Controller Control(Optional).
- 4.Press key to switch color and mode.
- 5.Control by SmartLife APP.
6. Works with Amazon alexa and Google home and so on.

Product Parameter

| | |
|----------------------|--|
| Model Number | WD300 |
| Category | LED Controller |
| Domination Principle | WiFi |
| APP | SmartLife |
| Language | Chinese、 English |
| Operation Platform | Android4.0 or IOS9.0orhigher |
| Sound Sensor | MEMS MIC |
| LED Drive Type | Constant voltage: MOSFET |
| Channels | 3 |
| Input Voltage | DC (4、5-25) V |
| Max Output Power | 144W |
| Work For | LED Strip or other constant voltage lights |
| Connect Method | Common Anode |
| IP Rating | IP20 |
| Control Distance | Visible distance 30M |

Key Instruction:

- ① built-in microphone, the lights strip sync with any sound sources.
- ② the lights strip can sync with music.
- ③ turn on/off the led strip lights.
- ④ switch colors and different light mode.

Cutting & Connectors Application:

Software Manual

Download and Install App

Use your phone to scan the QR code below or search"Smart Life" in application marker to Download and install the App

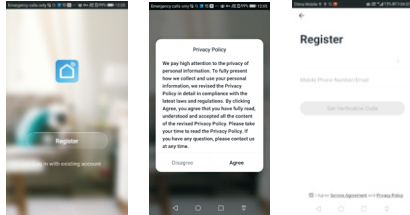

Register/Login/Forget password

Register:Register your account to the following tips before using at the first time.If you have an account,please enter the password to login directly.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
