MagneticWireless Charger

User Manual

Safety and Handling

WARNING: Failure to follow these safety instructions could result in fire, Electric shock, injury, or damage to the Magnetic Wireless Charger or other property.Read all the safety information below before using the Magnetic Wireless Charger.

Liquid Exposure

Keep the Magnetic Wireless Charger away from sources of liquid, such as drinks, oils, Lotions, sinks, bathtubs, and shower stalls. Protect the Magnetic Wireless Charger from Dampness, humidity, or wet weather, such as rain, snow, and fog.

Power

Provide power to the Magnetic Wireless Charger using compatible
Power adapters, or third-party power adapters that are compliant with
Applicable country regulations and international and regional safety
Standards, including the Standard for Safety of Information Technology
Equipment(IEC/EN 60950-1) and the Standard for Safety of Audio/Video,
Information and Communication Technology Equipment (ICE/EN 62368-1). Other
Adapters may not meet applicable safety standards, and using them coild
Pose a risk of death or injury
Recommended Power Adapter Specifications
Frequency: 50 to 60 Hz, single phase
Line Voltage: 100 to 240 VAC
Input Voltage/Current: DC 5V/2.0A, DC 9V/2.0A/DC 12V/1.5A
Output Power: 5W/7.5W/10W/15W
Output Port: USB-C
Don't use the Magnetic Wireless Charger or the USB-C power adapter in wet
locations, such as near a sinkmbathtub, or shower stall, and don't connect
Or disconnect them with wet hands. Disconnect the Magnetic Wireless Charger, its

Cable and the power adapter if any of the following conditions exists: You Want to clean the Magnetic Wireless Charger or the power adapter; the power cord or plug becomes frayed or otherwise damaged; the Magnetic Wireless Charger, its Cable, or the power adapter is exposed to rain, excessive moisture, or liquid; or the Magnetic Wireless Charger, its cable, or the power adapter has been dropped, Damaged, or you suspect that service or repair is required. When you use the USB-C power adapter, make sure the cable is fully inserted into the power
Adapter before you plug the adapter into a power outlet When using the Magnetic Wireless Charger, remove metallic cases and avoid p; acing Metallic foreign objects on it (for example, keys, coins, batteries, or jewelry), as they may interfere with charging or become warm enough to cause Discomfort or injury if your skin comes into contact with them. Don't placeany item with an RFID tag(for example, a contactless credit card, passport, or access card) on the Magnetic Wireless Charger, because the RFID tag could be damaged.

Prolonged Heat Exposure

The Magnetic Wireless Charger and its cable comply with the applicable surface Temperature standards and limits defined by the International
Standard for Safety of Information Technology Equipment(EC/EN 60950-1) and the Standard for Safety of Audio/Video, Information and Communication Technology Equipment (ICE/EN 62368-1). However, even within these limits, sustained Contact with warm surfaces for long periods of time may cause discomfort or injury. Use common sense to avoid situations where your skin is in Contact with the Magnetic Wireless Charger, the power adapter, or devices on the Magnetic Wireless Charger when it's operating or connected to a power source for longPeriods of time, For example. don't sleep on the Magnetic Wireless Charger, the power Adapter, or devices on the Magnetic Wireless Charger, or place them under a blanket,

Pillow, or your body, when it's connected to a power source. It's important to Keep the Magnetic Wireless Charger and the power adapter in a well ventilated area When in use or charging. Take special care if you have a physical condition That affects your ability to detect heat against the body

Repairing

Don't attempt to repair the Magnetic Wireless Charger yourself. Disassembling the Magnetic Wireless Charger may damage it or cause injury to you. If the Magnetic Wireless Charger is damaged or malfunctions, discontinue use and contact Authorized Service Provider.

Exposure to Radio Frequency Energy

The Magnetic Wireless Charger contains magnets and radios that emit electromagnetic fields. These electromagnetic fields may interfere with medical devices, such as pacemakers and defibrillators. Consult your physician and medical device Manufacturer for information specific to your medical device and whether you need to maintain a safe distance of separation between your medical deviceand the Magnetic Wireless Charger. If you suspect the Magnetic Wireless Charger is interfering With your medical device, stop using the Magnetic Wireless Charger.

System Specifications

Input Voltage/Current:DC 5V/2.0A or 9V/2.2A or 12V/1.5A
Operating Temperature:0-30°C

Note: Magnetic Wireless Charger is charging for Mini light mainly, and can be also used as wireless charger for cell phone.

This product's packaging materials are recyclable and can be reused. This product and the accessories packed together are the applicable product to the WEEE directive except batteries. Please dispose of any materials in accordance with your local recycling regulations. When discarding the unit, comply with your local rules or regulations. Batteries should never be thrown away or incinerated but disposed of in accordance with your local regulations concerning chemical wastes.

The CE mark indicates that this product has been manufactured according to current regulations for electromagnetic fields, which means that it is safe to use if used according to safety instructions. The product is manufactured according to current regulations within the EU legislation, limiting the use of hazardous substances in
electrical and electronic equipment.technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Caution: The user is cautioned that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: —Reorient or relocate the receiving antenna. —Increase the separation between the equipment and receiver. —Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. —Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement

The device has been evaluated to meet general RF exposure requirement.
