## Package Contents

**SleepHalo™** Charger Base

1M Cable

Power Adapter (UK)

## Compatibility for Wireless Charging

**SleepHalo™** has been designed to be compatible with Qi enabled phones. A list can be found on our website.

If your phone is not wireless compatible it can still be used with your existing wired charger by placing the plugged-in phone onto **SleepHalo™**. You will then benefit from the radiation protection offered by **SleepHalo™**.

## Connecting your SleepHalo™

Decide which side of the bed you wish to place your SleepHalo™, noting that the raised protection shield should be between you and the phone. On the underside of the product you can route the power cable in 2 directions. Choose which route is best, plug in the connector to the power port and clip the cable through the rebated area.

Connect SleepHalo™ USB connector into the power adapter.

Plug SleepHalo™ power adapter into a wall socket.

## Using your SleepHalo™

To charge wirelessly, the phone must be placed onto **SleepHalo™** with the screen facing up. The indicator LED on the side will change from red to blue once phone is correctly placed. Place the phone on the centre of **SleepHalo™**.

If the red LED flashes, this indicates the phone is not aligned correctly. Fully remove and then replace. Correct charging can also be confirmed by checking the screen of your phone for the charge icon.

### LED Colour

### SleepHalo™ Status

Red

Standby

Blue

Charging

Green

Fully Charged (dependent on phone)

Flashing

Phone not aligned correctly  
Or foreign object detected

## How to position SleepHalo™ on bedside table

When positioning SleepHalo™, position it so that when you are laying down you cannot see the screen of your phone.

SleepHalo™ has rubber feet attached to the bottom to prevent it slipping. If you have a phone with a magnetic back, then sticky feet can be purchased from our website to hold SleepHalo™ down.

For further set-up information and Troubleshooting please visit our support page at [www.sleephalo.com](http://www.sleephalo.com) or email us at [support@angelelectronics.com](mailto:support@angelelectronics.com)

## Safety Information

- Using a different power adapter other than the one supplied with SleepHalo™ is at your own risk.
- Do not disassemble SleepHalo™, it is a sealed device.
- Whilst the phone is charging do not cover.
- Do not place anything other than your phone onto SleepHalo™.

### SleepHalo™

- Input: 5V 1A
- Output: 5W
- Wireless Range : 5mm

## Declaration of Conformity (FCC)

**Warning:** Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference
- (2) this device must accept any interference received, including interference that may cause undesired operation.

**NOTE:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
