How to connect your Smart Switch to Amazon Alexa

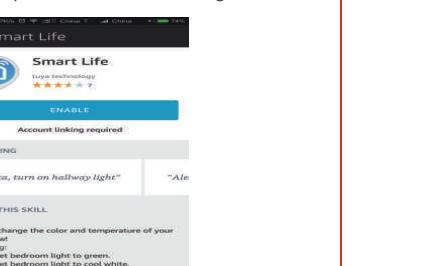

1. Launch Smart Life App, sign in your account and make sure your Smart Switch is in your device list.
2. Name each device, such as living room light or bedroom light, so that Alexa can easily recognize them.
3. Minimize Smart Life App, then launch the Alexa App and sign in your Alexa account and make sure you have at least one Alexa voice-controlled device installed like Echo, Echo Dot, etc.
4. In the upper left corner of Home page, click button to show App menu. Then click in the menu.

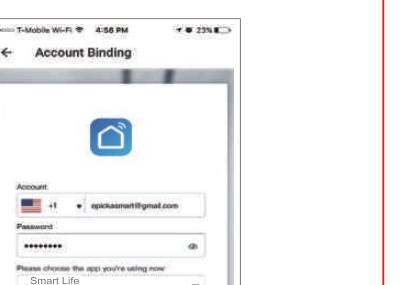

5. Type in "Smart Life" in the search and click the search button.

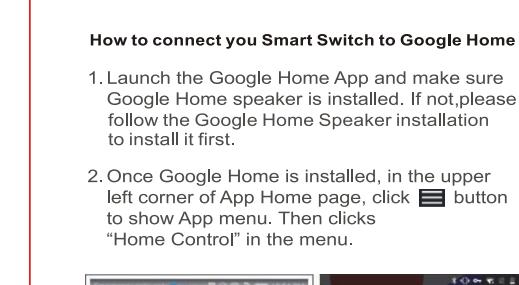

6. Enable Smart Life, then sign in your Smart Life account to complete the account linking.

7. After successful account linking, ask Alexa to discover devices. After a 20-second device discovery, Alexa will show all the discovered devices.

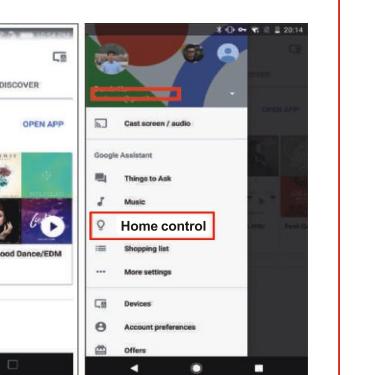

8. Back to Menu by clicking button, and then click button.

How to connect your Smart Switch to Google Home

1. Launch the Google Home App and make sure Google Home speaker is installed. If not, please follow the Google Home Speaker installation to install it first.

2. Once Google Home is installed, in the upper left corner of App Home page, click button to show App menu. Then click "Home Control" in the menu.

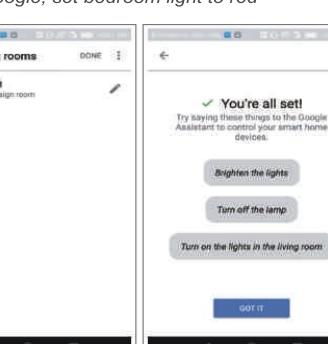

3. On "Add devices" page, scroll down to find "Smart Life" and then click it. Sign in Smart Life App with your Smart Life App account and password, choose "Smart Life" App in the dropdown menu to complete the account linking.

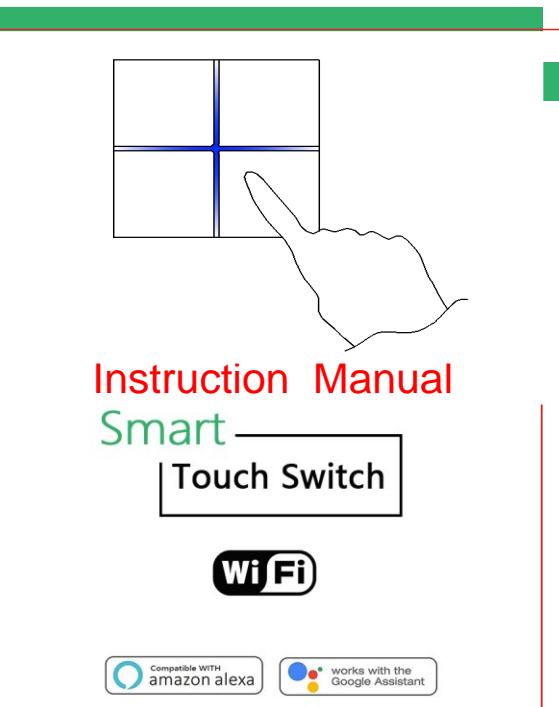

4. After successful account linking, in Google Home App you can see all the smart devices from your Smart Life App account. You can assign rooms for each device.

5. Now you can use Google Home to control your smart devices, you can say like:

Ok Google, turn on/off wall light

Ok Google, set bedroom light to red

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To assure continued compliance, any changes or modifications not expressly approved by the party.

Responsible for compliance could void the user's authority to operate this equipment. (Example- use only shielded interface cables when connecting to computer or peripheral devices).

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

FCC Radiation Exposure Statement:

The equipment complies with FCC Radiation exposure limits set forth for uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
