

High Lumen Flashlight Laser Sight

* Wireless Remote Control Switch

* Model: HL02G

Also For: HL02R

Instruction Manual:

HI PERFORMANCE LASER FLASHLIGHT WITH 1000 LUMEN LED

The HL02 High Performance Tactical Laser Sight and Flashlight Combo is designed and built for standard and sub-compact pistols with integrated railing systems. The HL02 laser is a Class IIIa visible green/red laser with windage and elevation adjustments with 1000 lumen light. The green laser has excellent low temperature working performance. Rail grip clamp system securely attaches/detaches quickly and safely with no tools. Use just the laser, just the light or both.

Features:

- . Ambidextrous On/Off Switch
- . Light: Up to 1000 Lumen / Laser Wavelength: 520 nm
- . Windage and Elevation Adjustments
- . Fast, safe, adjustable and secure mounting to picatinny rail
- . Weight: 140g with Batteries
- . Dimensions LxWxH: 2.75"x1.6"x1.96" in
- . 3 Modes (laser, light, laser / light) ("light only" can be solid beam or strobe)
- . Rechargeable CR2 battery that can be also replaced from battery cavity
- . Laser Sight Can Be Recharged via USB cable with Computer USB, Power Bank USB, Cellphone Charger USB and Car-Charger USB
- . Charger Is Not Included, Universal Charger Is OK

Charging The Battery:

*Magnetic Touch Charging

1. Take out the charging adapter and cable, connected them together (See figure A)
2. Have the charging adapter connected with the cable, the Mag charging Dock connected with the product. (See figure B)
3. Charging time: 2 Hours Approx, full in charge when the 4 indicated lights come in steady.
4. Remove depleted batteries, if any. (See figure C)

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment
