EUT View 3	
EUT View 4	

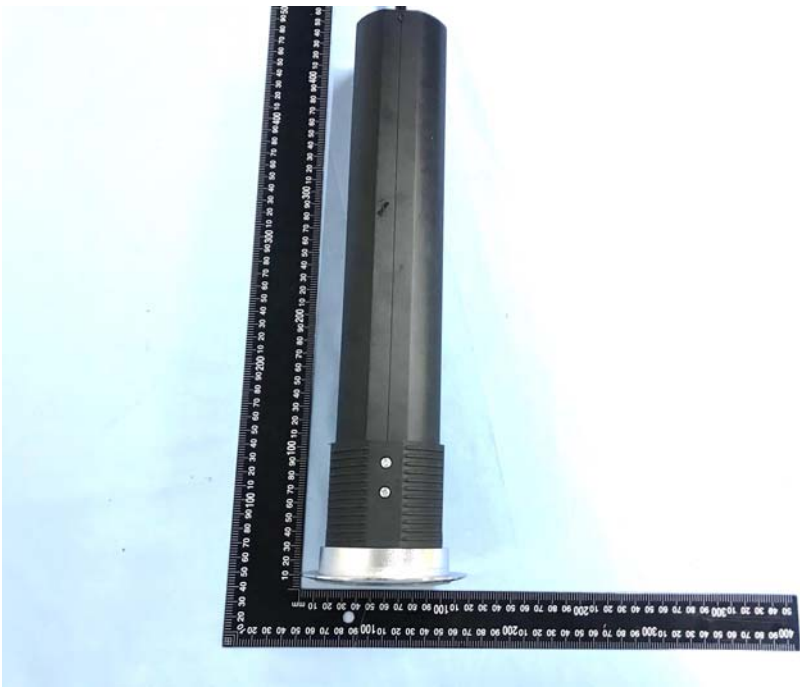

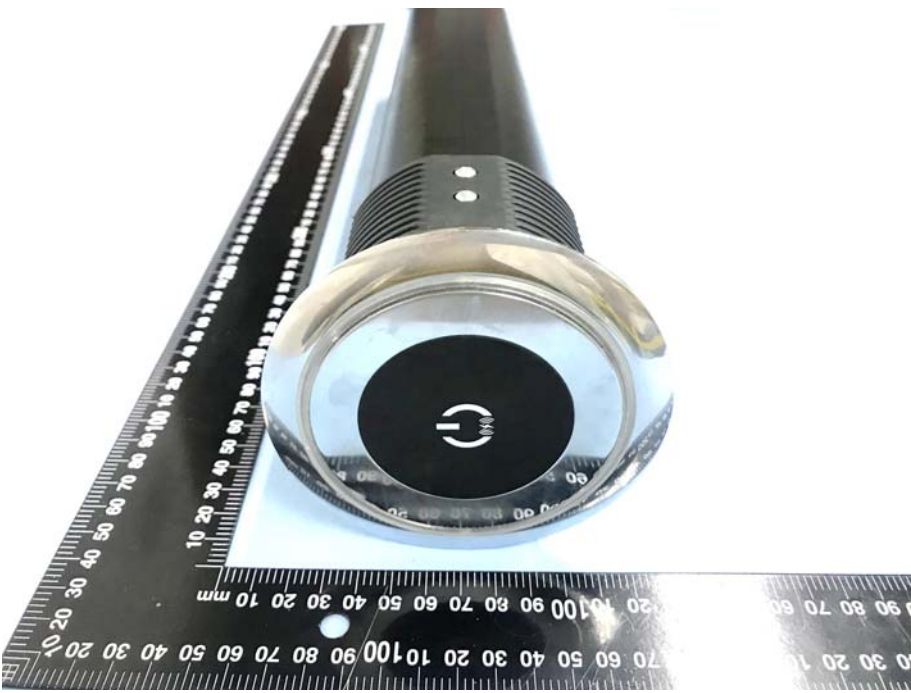

EUT View 5	 A side view of a black cylindrical device, likely a probe or test lead, standing vertically. It has a silver-colored base with two small circular features. A ruler is placed to its left for scale, showing measurements in millimeters and centimeters.
EUT View 6	 A close-up view of the silver-colored base of the device. It features a circular contact area with a black center and a silver ring. A ruler is placed below it for scale, showing measurements in millimeters and centimeters.

EUT View 2	

EUT View 3	 A black cylindrical electronic unit (EUT) is shown vertically. It has a silver-colored base. A black ruler is placed horizontally next to the unit for scale. The unit is positioned against the ruler's markings, which range from 0 to 100 mm.
EUT View 4	 A black cylindrical electronic unit (EUT) is shown vertically. It has a silver-colored base. A black ruler is placed horizontally next to the unit for scale. The unit is positioned against the ruler's markings, which range from 0 to 100 mm.

EUT View 5	 A side view of a black cylindrical device with a silver-colored base. The device is positioned vertically next to a black ruler with white markings. The ruler shows measurements in millimeters and centimeters. The device has a textured black body and a smooth silver base.
EUT View 6	 A front view of the device, showing a circular lens with a black center and a silver-colored outer ring. The lens has a power symbol (a circle with a vertical line) in the center. The device is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters and centimeters.

EUT View 7	 A black cylindrical device, likely a power supply or battery, is shown lying horizontally. A black cable is connected to one end. A ruler is placed below the device for scale, showing measurements in millimeters and centimeters. The device has a smooth, matte finish and a small circular feature near the cable connection.
EUT View 8	 The same black cylindrical device is shown vertically. A black cable is connected to the top. A ruler is placed to the left of the device for scale. The device has a smooth, matte finish and a small circular feature near the cable connection.
