

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 This photograph shows the internal components of the EUT housing. On the left is a green printed circuit board (PCB) with a circular copper coil in the center. Several colored wires (red, black, white, yellow) are connected to the board. To the right of the PCB is a clear, circular plastic housing with a black circular component in the center. A black ruler with white markings is placed below the components for scale, showing measurements in millimeters.
Solder Board-Component View 1	 This photograph provides a close-up view of the solder joints and components on the PCB. It shows various electronic components including capacitors, resistors, and integrated circuits. Two orange electrolytic capacitors are prominent on the right side. A yellow component is visible in the center. A black ruler with white markings is placed below the board for scale, showing measurements in millimeters.

Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) with various electronic components. A large yellow rectangular component is prominent in the center. The board is populated with numerous surface-mount components, including resistors, capacitors, and integrated circuits. Two blue wires are connected to the left side of the board. A black ruler with white markings is placed below the board for scale, showing measurements in millimeters.
Solder Board-Component View 3	 A photograph of a green printed circuit board (PCB) with various electronic components. Two large white rectangular components are visible. The board is populated with numerous surface-mount components, including resistors, capacitors, and integrated circuits. Two black wires are connected to the right side of the board. A black ruler with white markings is placed below the board for scale, showing measurements in millimeters.

Solder Board-Component View 4	 A photograph of a green printed circuit board (PCB) component, labeled '4', positioned next to a black ruler with white markings. The component features a large silver heat sink, several electronic components, and two connectors labeled 'CN1' and 'CN2'. Red and black wires are connected to the board. The ruler shows measurements in millimeters, with the component spanning approximately 40mm in width and 20mm in height.
Solder Board-Component View 5	 A photograph of a yellow printed circuit board (PCB) component, labeled '5', positioned next to a black ruler with white markings. The component features two black integrated circuits (ICs) and two circular solder pads. Red and black wires are connected to the board. The ruler shows measurements in millimeters, with the component spanning approximately 40mm in width and 10mm in height.

Solder Board-Component View 6	 A photograph of a small, rectangular green printed circuit board (PCB) component. The board is populated with several surface-mount components, including a small integrated circuit (IC) and several resistors. Two thin wires, one red and one black, are soldered to the top of the board. The component is placed on a black surface with a white ruler for scale. The ruler shows measurements in millimeters, with the component spanning approximately 20 mm in length and 10 mm in width. Text on the board includes "LSB HOLDING 331983A Y15-200807" and "Version V1".
Solder Board-Component View 7	 A photograph of a larger, irregularly shaped green printed circuit board (PCB) component. The board is populated with numerous surface-mount components, including several integrated circuits (ICs), resistors, and capacitors. A red wire is soldered to the top of the board. The component is placed on a black surface with a white ruler for scale. The ruler shows measurements in millimeters, with the component spanning approximately 100 mm in length and 50 mm in width. Text on the board includes "25985-0280R", "200528 U2.0", and "U21".

Solder Board-Component View 8	 A photograph of a green, circular printed circuit board (PCB) with a complex, irregular shape. The board is populated with various electronic components, including a central microcontroller, several resistors, and a small black component on the right. A red wire is connected to a pin on the left side. The board is placed on a black surface with a white ruler for scale, showing measurements in millimeters.
Solder Board-Component View 9	 A photograph of a rectangular green printed circuit board (PCB) populated with various electronic components. A prominent red component is visible on the left side. The board is placed on a black surface with a white ruler for scale, showing measurements in millimeters.

Solder Board-Component View 10	 A photograph of a green printed circuit board (PCB) component, likely a solder board, placed on a black surface with a white ruler for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The PCB is rectangular with various electronic components, including a red capacitor and several solder joints. A red wire is connected to one of the components.
Antenna View	Wireless Charger Antenna  A photograph showing the underside of a circular device, likely a wireless charger, with a green PCB and a circular antenna coil. A red box highlights the antenna coil, and a red line points to it from the label "Wireless Charger Antenna". The device is placed on a black surface with a white ruler for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The antenna coil is a circular inductor with multiple turns of copper wire. A yellow component is also visible on the PCB.
