

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a spectrum analyzer sits on a wooden table, displaying a graph on its screen. A power line cord is plugged into a wall outlet and connected to a power source. On the right, a black cylindrical antenna is also on a wooden table, connected to the same power source. The power source is a silver metal box on the floor with various cables connected to it.
Radiation Emission View (Below 30MHz)	 A photograph of a radiation emission test setup. A yellow, rectangular test object is placed on a metal stand in the center of a room. The room's walls are covered with white, square-shaped electromagnetic shielding tiles. A black metal frame stands around the test object. On the floor, there are yellow and black striped safety lines. A silver metal canister is visible on the floor near the frame.
