

**1 Install Babysense Connect device as per User Manual Instructions**

Supplied rechargeable batteries need to be fully charged before the first use!

**2 Plug the Hub into an electrical outlet**

Ensure that it is in the same room as the Babysense Control Unit and is within working range of your home WiFi network.

The Hub connects to your home WiFi Network and supports the connection to the Babysense. Whilst connected it provides you with remote access from outside the house.

**3 Download Babysense Connect App**

From your mobile devices application store or by scanning the QR Code below

**4 Follow the pairing instructions as prompted by the app**

Once you have the application installed, it will establish the required WiFi connection from the Hub to your WiFi router, and a safe Bluetooth connection from the Hub to the Babysense Control Unit.

**5 Connection Established**

Now that you have successfully implemented the above steps- your installation is complete and you can start using the device!

**FCC Caution:**

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.
