4、FAQ

1、Can't add the camera?

Please read the instructions and check the wifi router, If the camera always failed to be added after repeated attempts, please contact the customer service.

2、How to reset the camera?

Please press the reset button until the lights off, then wait for a few seconds until the lights on.

3、Different status of the indicator light

Red light always on Camera is starting or operating abnormally

Red light flashes Camera is waiting for wifi connection

Blue light always on Camera is working

Red/Blue light flashes rapidly The camera is connecting to wifi

4. What if the camera has been added already?

Please contact the customer service and provide the SN number of the camera, the SN number was printed on the camera label.

5、What's the difference of the timeline's colors?

Red means motion detection video and green means normal recording.

6、Why does it have some blank space in the timeline?

It means no video file in that time, the camera will stop working after outage or the internet is disconnected, If it is abnormal power failure, please check the power supply, power cable and the machine power interface is normal.

7、The TF card can't be identified?

Please check the TF card if it meets the quality requirements, and please restart the camera after the TF card has been inserted into the camera.

The TF card can't be identified when the internet environment is not good.

8、Why I can't get the notifications with my cell phone app?

Please make sure the APP has got all the message pushing rights, if not please reset it.

In the normal condition, every message will be pushed to your phone, the notifications sound or vibrating are depending on the cell phone system settings

9、Camera disconnect?

Please check the power and the Internet, if they are good please restart the camera. If the camera still doesn't work after restart, please delete the camera in the APP and reset the camera, then add the camera in the APP again.

10、If the video is unable to load?

According to the status of the indicator.

1、indicator light doesn't work means there is no power, please check the adapter and the power cable. You can try another 5V/2A power adapter.

2、The indicator light is in on

A: When the indicator is red, it means the Internet is disconnected, please check the wifi and restart the wifi router. Move the camera closer to the wifi router.

B: When the indicator is blue, it means the Internet is good, please check your cell phone's wifi or 3G/4G network signal.

11、Why is there a circle in the middle?

It means the video loading, please check the network environment and move the camera closer to the wifi router.

12、How many people can use your account?

One camera can only be added to one account

13、How many people can use the account simultaneously?

No limited.

14、 Why the functions are not completed in the other visitors' account.

For security reasons, the visitor accounts don't have all the rights to control the camera, some of the functions are unusable.

15、 Why do I lose my camera with another phone?

One camera can only be added to one account/device, if you need to add the camera to another account, please delete the camera in the first device.

16、 Can I watch my video after my camera was stolen?

1、 If you ordered cloud storage service, you can watch the video which was recorded in the past 7 days.

2、 If the video was saved to the memory card, you can't watch the video any more because the memory card was stolen too, but you can check the pictures in the APP.

17、 How to change a WiFi signal?

Please reset the camera and add it in the APP again.

18、 How to check the video by computer.

Please install CloudEdge client software.

19、 Why does it have photo noise in low light environment.

The low light will influence the quality of the picture, in order to improve the quality of the picture, the camera will be switched to black-and-white mode.

If you want to know if it's in black-and-white mode, please check the infrared, the infrared will be turned on when the camera was switched to black-and-white mode.

20、 How to confirm my router WiFi is 2.4GHZ or 5GHZ?

Please enter the model of your wifi router in Google.

21、 How to confirm my cell phone connection WiFi is 2.4GHZ or 5GHZ?

In normal condition, dual-band WiFi router will launch 2 kinds of wifi signal like "XXXX_2.4G" and "XXXX_5G", if you are using "XXXX_2.4G" or you can search the "XXXX_2.4G" signal, it means your wifi supports 2.4GHZ.

Only dual-band WiFi router will launch 2 kinds of wifi signal.

If you changed the SSID of the wifi router before, please go to the router setting page and check which one is 2.4G signal.

6. Please follow the instructions in this chapter.

FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- - Reorient or relocate the receiving antenna.
- - Increase the separation between the equipment and receiver.
- - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- - Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Statement

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance of 20cm the radiator your body. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.
