GPT SMARTWATCH
User manual

Welcome to use our high-performance wrist-band smart watch which creates thoughtful and health experience for you.

Please make a full charge before use it.

APP: Da Fit

1.Download & Pairing

1.1 Long press side button "OPEN" to turn on.

1.2 Scan below QR code to install Da Fit APP, or download "Da Fit" from App Store, Google Player then install it.

Only for downloading app usage

Compatible System: Android4.4 and above, iOS 8.0 and above

1.3 Open the mobile APP, select the device to be bound in the APP device list

Step1: Turn on mobile phone Wireless Function

Step2: Open "Da Fit" APP, tap "Add a device" to connect.

Step3: Turn on phone menu on the watch.

Step4: View the last four digits of the MAC address "About" in the watch menu, such as "0000", and then click "Connect watch" in the application program

"Dafit" to search for MAC addresses that are the same as the last four digits of "0000". After the connection is completed, a "Wireless Function pairing request" will pop up, click "pairing", and follow the following steps.

1.4 GPS Function Usage and Problem Solving.

After successfully pairing the watch with the mobile app, the watch will automatically   update its star data. When using the GPS function, please turn on the sports mode. Currently, GPS only supports 5 sports modes (walking, running, outdoor cycling, cross-country running, hiking). You can wait for GPS positioning success on the sports mode interface or directly enter the sports module. Watches can also perform satellite positioning during movement. If the app is not connected for a long time, the star data will update and become invalid. It is recommended to disconnect the mobile app and the wireless model of the product in the phone settings. After restoring the appearance settings of the watch, reconnecting the watch can solve the problem of location not being found.

1.5 CHAT GPT&AI Function

When using GPT and AI dial functions, ensure that the watch is successfully connected to the app. Open the function interface, click on the screen, and confirm the question you want to ask and the words you want to generate for the dial.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

To assure continued compliance, any changes or modifications not expressly approved by the party.

Responsible for compliance could void the user's authority to operate this equipment. (Example- use only shielded interface cables when connecting to computer or peripheral devices).

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) This device must accept any interference received, including interference that may cause undesired operation.

RF warning statement:

The device has been evaluated to meet general RF exposure requirement.

The device can be used in portable exposure condition without restriction.
