Programming Instructions

Information & Safety Warnings

- Protect your User Codes and Master Code.
- Protect your key. It is suggested to put it outside the door, such as your car.
- Restrict access to your lock's interior assembly and routinely check your settings to ensure they have not been altered without your knowledge.
- This lockset is designed to provide the highest standard of product quality and performance. Care should be taken to ensure a long-lasting finish. When cleaning is required use a soft, damp cloth. Using lacquer thinner, caustic soaps, abrasive cleaners or polishes could damage the coating and result in tarnishing.

⚠ IMPORTANT: Do not load batteries until lock is completely installed.

Definitions

Master Code

Required for programming and feature settings. Master code can be used to unlock the door under vacation mode. The default master code needs to be changed before programming.

Property owner/manager should keep this information confidential.

1. Master Code(6 to 8) digits: The default Master Code is 123456.

It is required that you change it to a code of your own before programming.

2. User Code(6 to 8)digits: A total of 200 User Codes may be programmed.

Auto Lock

Automatically locks the deadbolt after unlocking. This feature is off by default. You can set the auto lock time in the app.

Wrong Entry Limit

After 5 unsuccessful attempts at entering a valid PIN code, the unit will shut down for 5 minutes.

Unlock with Fake Code

User can prevent PIN code exposure from strangers by entering random digits before or after PIN code.
