

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the EUT housing and board assembly. The assembly is placed on a blue textured surface next to a black ruler with white markings. The ruler has two scales: one in centimeters (0 to 10) and one in millimeters (0 to 100). The assembly consists of a clear plastic housing, a gold-colored metal cap, and a small electronic board with various components and a white cable. The board is connected to a multi-colored ribbon cable that is coiled inside the housing.
Solder Board-Component View 1	 A close-up photograph of the solder board component. The component is a small electronic board with various components, including a red capacitor, a green capacitor, and a black integrated circuit. A white cable is attached to the board. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler has two scales: one in centimeters (0 to 10) and one in millimeters (0 to 100).

Solder Board-Component View 6	 A photograph showing a small electronic component, likely a microcontroller or module, mounted on a blue solder mask. The component is positioned near a black ruler with white markings. The ruler shows measurements in millimeters, with the component located between the 10 mm and 20 mm marks. The component has a gold-colored surface with various markings, including "CSN" and "101".
Antenna View	 A photograph showing a small electronic component, likely a microcontroller or module, mounted on a blue solder mask. The component is positioned near a black ruler with white markings. The ruler shows measurements in millimeters, with the component located between the 10 mm and 20 mm marks. The component has a gold-colored surface with various markings, including "CSN" and "101". A red box highlights a specific feature on the component, labeled "WIFI Antenna".
