Federal Communications Commission  
7435 Oakland Mills Road  
Columbia, MD 21046

To whom it may concern:

**Lazurite Holdings LLC** hereby requests a Permissive Change Class II of the radio equipment certification for the UWB Radio Module certification number, FCC ID: 2AZYQ-01A. This product differs from the originally approved product in the following manner:

- (a) Antenna Characteristics. – The module was retested with a new antenna which is a Taoglas FXUWB10.07.0100C Flex Series UWB antenna.

I do attest that the Field strength and/or RF Output readings remained the same or are lower than the originally approved product and that they did not increase therefore qualifying this product for this application type.

Best Regards,

 9-29-2021
