

LiLz Inc.

Model: LC-10

FCC ID: 2BA68LC

IC: 30584-LC

### Label Design and Location

- (1) Labelling method: The label printing of this product is marked using a pulse oscillation fiber laser marker (FAYb laser). The laser beam heats the surface of the target object to mark it, making it impossible to easily erase the label.
- (2) Position: Back of the equipment
- (3) FCC ID is displayed with at least 4 points.
