

C5 Heart Rate Monitor Use Manual

HOW TO WEAR C5:

* Note: Please remove the battery insulator sheet before using the heart rate sensor.

1. Snap the sensor into the strap.

2. Adjust the strap to fit on your chest snugly, but comfortably.

3. Moisten the contact points on the back of the strap with water (a little) or electrode gel to improve conductivity.

4. Wrap the loose end of the strap around your chest and snap into place.

5. Make sure the electrode area is close to your skin, so that the sensor is at the front of your chest.

LED indicator

HR monitor will be activated after properly match, the LED light will start to flash, then can connect the device with MEILAN bike computer or APP; if HR monitor has not been connected for more than 10 seconds, it will enter the sleep state, need to be reactivated before use.

When HR monitor is successfully connected by the bike computer or APP, the LED indicator will show steady light; light off after 20 seconds .

Please replace the new battery in below conditions:

1. The indicator no light
2. HR monitor can't be searched
3. The heart rate value appears intermittent

FCC Warning

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Radiation Exposure Statement

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
