Federal Communications Commission
7435 Oakland Mills Road
Columbia, MD 21046

We, Linkplay Technology Inc. attest that this device under FCC ID 2BABF-SUB001 complies with device protocol requirements and operational restrictions for Client Devices.

- a) This device will only associate and connect with a low-power indoor access point or subordinate device and never directly connect to other client devices.
- b) This device will always initiate transmission under the control of a low-power indoor AP or subordinate except for brief transmissions before joining a network. These short messages will only occur if the client has detected an indoor AP or subordinate operating on a channel. These brief messages will have a time-out mechanism such that if it does not receive a response from an AP it will not continually repeat the request.
- c) All transmissions will be lower or equal to the power advertised by the indoor low-power access point or subordinate and never above the maximum output power allowed by the FCC grant for equipment class 6XD.
- d) Devices are prohibited for control of or communications with unmanned aircraft systems, including drones.
