

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing the setup for a conducted emission test. On the left, a piece of electronic equipment, possibly a power supply or a test instrument, sits on a white table. Various cables are connected to it. In the center, there's a power strip with several outlets, some of which are occupied by cables. To the right, a large, light-colored wooden board is leaning against a wall. The background is a plain, light-colored wall.
Radiation Emission Test Setup (Below 30MHz)	 A photograph of a radiation emission test chamber. The chamber is a large, rectangular room with walls covered in white, square-shaped electromagnetic interference (EMI) shields. The floor is also covered with similar shields. In the center of the chamber, there is a black, rectangular test fixture mounted on a stand. The fixture has a circular base and a vertical support. The floor is marked with blue and white diagonal stripes, indicating a safety or measurement area.

**Radiation Emission
Test Setup (Above18GHz)**

*** Means' only test and setup for PART 15C .**
