ROHS material control report

We hereby certify that the raw materials used in the components and auxiliary materials delivered to your company, as well as the additives used in the production process, comply with the environmental requirements of the RoHS Directive on the use of hazardous substances (RoHS Directive 2011/65/EC)

The composition of raw materials used for components and auxiliary materials, packaging materials and additives used in the production process is reported as follows:

| Composition material name | Composition material | ICP report number | Testing agency | testing time | Contaminant content (ppm) | | | | | | Are they qualified? PASS? |
