

Solder Board-Component View 14	 A photograph of a green printed circuit board (PCB) component, identified as View 14. The component is square-shaped with rounded corners and features a central circular area with internal traces. It is positioned on a blue background. A metal ruler is placed vertically to the left of the component, showing a scale from 1 to 10 mm. Another metal ruler is placed horizontally below the component, also showing a scale from 1 to 10 mm. The component's dimensions are approximately 10 mm by 10 mm.
Solder Board-Component View 15	 A photograph of a white printed circuit board (PCB) component, identified as View 15. The component is rectangular and features a series of small, yellow, square-shaped components (likely LEDs or sensors) arranged in a row. It is positioned on a blue background. A metal ruler is placed vertically to the left of the component, showing a scale from 1 to 10 mm. Another metal ruler is placed horizontally below the component, showing a scale from 1 to 5 mm. The component's dimensions are approximately 10 mm by 5 mm.

Solder Board-Component View 20	 A photograph of a green printed circuit board (PCB) component, labeled 'SG00000 _AC Socket V10', showing various electronic components and solder joints. A yellow component is visible on the left. The board is placed next to a metal ruler for scale. The ruler shows centimeters from 1 to 10. The board has several circular pads and solder points, with labels A, B, C, D, and IXO visible.
Antenna View	Wireless Charging Antenna  A photograph of the same green PCB component, showing a circular inductive coil (antenna) on the back. The coil is made of multiple turns of copper wire. A yellow ribbon cable is connected to the coil. The board is placed next to a metal ruler for scale. The ruler shows centimeters from 1 to 10. A red box highlights the antenna area, and a red line points from the text 'Wireless Charging Antenna' to it.
