Justification for Re-use of Radio Test Results

We, Schneider Electric believe that the conducted signal test data on original reports provided by Laird Connectivity (ST60-2230C, FCC ID: SGQ-60SIPT approved on August 11, 2017, and IC: 3147A-60SIPT) for manufacturer Laird Connectivity LLC can be re-used for the following reasons:

1. Applicant has built in the radio module according to the specific radio module integration guides.
2. No changes have been made on the radio module.
3. Re-test the conducted power for spot check verification, the radiated spurious emission, and re-evaluated the RF Exposure.
4. Module is being used in SISO mode, enabled with the help of Laird team using the application note.
5. BLE is not being used in the final product.

A handwritten signature in black ink, appearing to read "Auy".
